## ADVANCED GRAMMAR AND SYNTAX

Advanced Grammar and Syntax represents the third and last phase of the comprehensive program of SC-15A. It introduces a thorough analysis of the Serbo-Croatian sentences in six lessons with supplemental exercises for each of the lessons.

Additional translation, completion and reading comprehension exercises as well as a list of idiomatic expressions have been compiled separately.

I hope that the entire Serbo-Croatian program gives the student a complete knowledge of the language.

ACKNOWLEDGEMENTS

The NCS books by Ms. V. Legan, Russian Impersonal Constructions, and Mrs. Maureen Baginski, Advanced Russian Grammar and Syntax, as well as Prirucna Gramatika Hrvatskog Knjizevnog jezika by E. Baric, M. Loncaric, D. Malic, Dr. S. Pavesic, M. Peti, V. Zecevic and M. Znika - Skolska, Knjiga Zagreb, 1979, helped me write this textbook on advanced Serbo-Croatian grammar and syntax.

I am indebted to the above colleagues for helping me to complete this project.

Dr. Ludmilla Jasenovic

## LESSON 1

### VERBAL ASPECT

This section of our study of Serbo-Croatian deals with the finer points of verbal aspect. The information presented in this chapter further elaborates the structures and usages of verbal aspect as covered in Phases I and II.

Native English speakers tend to have difficulty using verbal aspect in Serbo-Croatian. However, a fuller understanding of verbal aspect will help the student to read, write, and speak Serbo-Croatian in a grammatically and stylistically correct manner. Perfective verbs, as we already know, may indicate:

a) the starting point of an action

Svi su se nasmejali. - Everyone started to laugh.

On je posao u školu. - He set out for school.

Ona je zaplakala. - She started to cry.

Petar je zaholeo. - Petar got sick.

On se je zaljubio. - He fell in love.

b) an action which is brief in duration

Mi smo posedeli. - We sat for a while.

Jesi polezala? - Did you lie down for a while?

Jesi pospavala? - Did you have a nap?

c) a prolonged action occurring over a definite period of time

Prozivela sam tamo 3 godine. - I lived there for 3 years.

Promislila sam o tome. - I thought it over.

Prosetala se jutros. - She took a stroll this morning.

d) a new state of affairs. It is a result, and this state of affairs remains unaltered, "in force," until the moment of speaking

Ona je zatvorila prozor. - She closed the window.

(Here the use of the perfective indicates that the window is still shut at the time the statement is made.)

Ona je zatvarala prozor.

(The use of the imperfective indicates that the window was closed but at the moment it is open. The action is "undone" when the imperfective

is used. In English there is no aspectual difference and therefore there is no difference in translation.)

Ja sam navikla na to. - I got accustomed to this.  
(The action took place and is completed.)

vs.

Ja sam se navikavala ali bez uspeha. - I tried to get used to it  
but without success.

(The imperfective aspect shows that an action was performed over a period of time, but no result was attained.)

On je dugo dokazivao to ali nije dokazao.  
He tried for a long time to prove this but did not prove it.

(The first verb is imperfective because the action spans a certain period of time and the second is perfective because the result was that he did not succeed.)

Ko je uzeo moju knjigu. - Who took my book?  
(The action is completed. The book is still with the person who took it.)

Ko je uzimao moju knjigu? - Who took my book? = uzeo i vratio

(The use of the imperfective implies that the action was done and then undone, that the action is no longer in force.)

e) the perfective aspect is also used when a sequence of actions occur

On je <sup>ustao</sup>, <sup>pojeo</sup> <sup>rucak</sup> i <sup>otisao</sup>. - He got up, ate his breakfast,  
and left.

(Here each completed action follows the previous one in the order narrated without the use of time adverbs such as zatim or onda.)

Completion of an action, regardless of tense, is always indicated by the perfective aspect.

### ASPECT AND THE INFINITIVE\*

The choice of aspect for an infinitive depends on what the speaker intends. If the speaker is concerned with completing an action expressed by the infinitive, he will choose a perfective infinitive. If the action does not express result or completion, the imperfective should be used.

However, specific situations would warrant the choice of one aspect over the other.

a) The choice of aspect may be dependent on other verbs.

1. An imperfective infinitive is required after verbs denoting the beginning, ending or continuation of some action.

pocinjati/poceti  
svrsavati/svrsiti  
prestajati/prestati  
prekracati/prekratiti  
produzavati/produziti

2. The imperfective infinitive is also used after other verbs whose meaning suggests that a verb indicating a process should follow. Some of these verbs are:

privikavati/priviknuti  
otvikavati/otviknuti  
uciti/nauciti  
dosadivati/dosaditi  
umoriti se  
izbegavati/izbegnuti

3. A perfective infinitive is used with the following verbs:

zaboraviti  
uspeti

b) after verbs expressing desire, intention, request, or necessity, the choice of aspect is not automatic but depends on the meaning

Savetujem vam da kupite ovu knjigu.

(Here the advice is to buy a specific book; therefore, the perfective is used.)

Savetujem vam da kupujete voce u ovom ducanu..

(Here the advice is to perform an action habitually.)

Molim vas da ne zakasnite danas.

(Here the request is to arrive on time today.)

\*We use the word "infinitive," although the da construction is usually more applicable.

Molim vas da ne zakašnjavate uvek.

(Here the request is not to be late in general (all the time); therefore, the imperfective is used.)

The imperfective aspect is used to express the non-necessity, uselessness or harmfulness of an action.

Ne treba raditi. - It is not necessary to work.

Ne vredi govoriti. - It's no use talking.

Nema smisla misliti o tome. - It doesn't make sense to think about it.

Opasno je voziti auto. - It is dangerous to drive.

Dovoljno je pisano o tome - Much was written about it.

### Formation of Perfective Verbs by Prefixation

a) Very few verbs in Serbo-Croatian are primary perfective; i.e., verbs which do not have an imperfective. These verbs belong to the group of verbs which have ce or cn in their roots (početi-počnem - to begin, napeti-napnem - to tighten, to strain, zapeti-zapnem - to cock a trigger, to try hard.)

b) Most of the time imperfective verbs become perfective by prefixation:

pisati - napisati.

c) Sometimes prefixation turns a non-transitive verb into a transitive one: skociti - to jump, preskociti - to jump over something.

d) Prefixation can often change the basic meaning of the root of the verb completely: naci comes from the root ici - to go, but the meaning of naci is "to find."

e) Prepositions used as certain prefixes often occur in the same phrase with the complement to the verb:

doci do stola

izbaciti iz kuce

naici na prijatelja

nadnijeti se nad knjigu - to bend over a book

odmaknuti se od peci - to move away from the oven

uroniti u vodu - to dive (fall) into the water

uzmaknuti uz potok - to get out of a bad situation

The prepositions bez, medu, niz and preko are never used for prefixation.

f) Only 19 prefixes are used for prefixation. Nine of them have alternate forms. They are:

do-, iz- with alternate forms is-/is-/i-

mimo-, na-, nad- with alternates nat-/ nada-,

o, ob, op, oba are all alternates of each other.

od alternates with oda

po, pod alternate with the forms pot, and poda

pre-, pred- alternate with pret-

pri-, pro-, rcas- alternate with ras-, ras-, raz-, raza, ra-

s- alternates with z-, s-, sa-<sup>v</sup>

su-, u-, uz- alternate with us-, us-, uza- and za-

g) Most alternations occur as a result of voiced/voiceless mutations of the final consonant in the prefix.

1) voiceless alternates

is-	from iz-	e.g., iskociti: izleteti
op-	" ob-	opkoliti: obletiti
ot-	" od-	otpisati: odmaknuti
pot-	" pod-	potpisati: podloziti
pret-	" pred-	pretkazati: predbaciti
ras-	" raz-	raspisati: rasloziti
us-	" uz-	ustreptati: uzletjeti

2) voiced alternation forms

z- comes from the basic s- as, for example, in zbaciti: sljeteti

3) truncated alternation forms

i- from the basic iz-; e.g., isipati: izletjeti

ra- from the basic raz-; e.g., rasiti: razletjeti

4) Mutated alternation forms:

s- and z- come from the basic s-; e.g., zbaciti: sc̄esljavati

iz- and is- come from the basic iz-; e.g., isc̄etkati, sljetati,  
izletjeti

raz- and sas- come from the basic raz-; e.g., razdipati se,  
rasc̄istiti, razviti

us comes from the basic uz-; e.g., uscitati. uzletjeti

h) Some alternation forms have an a inserted between the basic prefix and the root; e.g.,

iz-a-gnati

nad-a-strijeti

ob-a-viti

od-z-zvati

pod-a-strijeti

s-a-kupiti (skupiti)

uz-a-vreti

An analysis of the basic meanings of prefixes follows. This information about the following 19 prefixes is essential for a complete understanding of verbal prefixation in Serbo-Croatian. The student is urged to learn the following meanings for each prefix.

1. do-
  - a. e.g., doci - to arrive at a certain place or point of time  
dobežati, dogurati, doživeti, dovuci se
  - b. to bring something to a certain place:  
dobaciti, dognati, dovesti, dotjerati
  - c. to achieve another goal:  
dograditi, dohraniti, dokositi, doreci
2. iz-
  - a. move something or oneself from an inner to an outward or from a lower to an upper position:  
izbaciti, izgovoriti, izgurati, izkociti, izici, iseliti
  - b. excessiveness:  
izljubiti, ispavati se, izvikati se
  - c. completion, thoroughness:  
izboriti, izgoreti, izlupati, izmeti, izvrstiti
  - d. distributive meaning:  
izopijati se, ispolagati
3. mimo-

This prefix is added to very few verbs and it does not influence the basic meaning of the verb. The most common verb with this prefix is mimoicí which originates from mimoilaziti (to go around).

4. na-
- a. to put one object on another:  
nagaziti, navuci, nametati
  - b. connotation of saturation in reflexive verbs:  
nacitati se, nalupati se, nagledati se
  - c. inchoative meaning:  
nagristi, napuciti
  - d. simple accomplishment (with no semantic alteration):  
naciniti, nagomilati, naučiti, napisati
5. nad-
- a. to arrive or put something over something else  
nadastrijeti, nadviti se, nadletjeti
  - b. excessiveness in meaning:  
nadigrati, natpjevati
6. o-/ ob-
- a. to encompass an object completely, to perform an action from all sides:  
obgrliti, obici,ograditi, ogrnuti, okruziti, opkoliti, okovati
  - b. general encompassing:  
obogatiti, obraniti, ocistiti, opljacketi
7. od-
- a. separation and withdrawal of an object and digression:  
odbaciti, odlepiti, opasti, otkazati
  - b. action of a verb denoting an answer to an unprefixed verb:  
odazvati se, odgovoriti, otpisati, odjeknuti
8. po-
- a. distributive meaning:  
polomiti, popusiti, počrkti, polijegati, porazbijati
  - b. limited action (for a while):  
poigrati se, polezati, posedati, popricati
  - c. action on the surface of an object:  
pogaziti, posoliti
  - d. finite action (concluded action, up to the end):  
pobuniti, pojesti, popiti, potonuti
  - e. transformation  
počupati, pokupiti
9. pod-
- a. action performed underneath an object:  
potkopati, potkovati, posmetnuti
  - b. finite action (concluded):  
pothraničiti, podmiriti

10. pre-
- a. an action done by crossing over an object;  
prebaciti, pregaziti, preletjeti, preskociti,  
previditi, prevuci
  - b. separation:  
prelomiti, preseci, pregristi
  - c. change of place:  
predati, preseliti, preliti
  - d. encompassing of time and space;  
pregledati, prebraniti, prenociti, prekriti
  - e. excessiveness, augmentation:  
prejesti se, preplatiti, prepunuti
  - f. finite (concluded) action:  
prebrojiti, prekrojiti
11. pred-
- This prefix indicates that something is put in front of something else.
- predbaciti, pretkazati, pretpostaviti
12. pri-
- a. indicates fusion, approach, addition:  
prigraditi, prikovati, pristupiti, privuci, privezati
  - b. addition:  
pritociti, privredeti
  - c. diminution:  
prikriti, pridici, pricuvati, pripitomiti, prisetiti se
13. pro-
- a. an action through something else:  
probosti, probusiti, prokopati
  - b. passing near something else:  
prohujati, projahati, projuriti, protrcati
  - c. finite (concluded) action:  
procitatи, prokleti, promrznuti, prozivjeti
  - d. inchoative connotation:  
progovoriti, propjevati, proplakati, proraditi
  - e. forbidding an action:  
prokazati, proreci

14. raz-
- a. separation of two or more parts:  
razagnati, razbacati, rastaviti, razdvojiti, razleteti
  - b. development and spreading around:  
razgledati, razmotati, razviti
  - c. returning to a previous state:  
raspopiti, razvencati
  - d. intensity:  
razbesniti se, razljutiti se, raspricati
15. s-
- a. unification, gathering:  
sabratni, sakupiti, sjediniti, sljepiti
  - b. separation, dissolution:  
sjahati, sleteti, svuci, zbaciti
16. su- (basic co- in English)
- a. association:  
sudjelovati, supostaviti
17. u-
- a. conclusion of an action inside something:  
ubaciti, uleteti, upasti, upisati
  - b. removal:  
ukloniti, umaci
  - c. finite (concluded) connotation:  
uciniti, uloviti, uraditi, umreti
18. uz-
- a. motion upwards:  
uzdici, uspentrati
  - b. motion in the opposite direction:  
uzvratiti, uzmaci
  - c. intensity and inchoative meaning:  
ushodati, uskliknuti, uzbuniti se, uzburkati

19. za-

This prefix has many different connotations.

- a. To take a position or put something into something:  
zabaciti, zakaciti, zametnuti
- b. to grasp something:  
zagrliti, zakrpati, zazidati, zakloniti
- c. to take a position:  
zadrzati, zastati, zaustaviti
- d. beginning of an action:  
zaplakati, zasvirati, zatresti
- e. conclusion of an action, quick action:  
zabiljeziti, zaplašiti

Choose the correct verb and fill in the blanks with the correct form.

1. Ona je videla pismo i \_\_\_\_\_ od radosti.  
smejati se/nasmejati se

2. Mi smo malo \_\_\_\_\_ i onda otisli kuci.  
sedati/posedeti

3. Zar je \_\_\_\_\_ u 3 sata?  
ici/poci

4. Mi smo \_\_\_\_\_ celi dan po sumi.  
ici/poci

5. On je \_\_\_\_\_ malo a zatim odgovorio na moje pitanje.  
misliti/pomisliti

6. Posle vecere oni su \_\_\_\_\_ dugo u parku.  
setati/posetati

7. Ovo je vrlo dobar roman, ja sam ga nekoliko puta \_\_\_\_\_.  
citati/procitati

8. Da li si \_\_\_\_\_ ove novine.  
citati/procitati

9. Ovde je hladno, da li je neko \_\_\_\_\_. prozor?  
otvarati/otvoriti

10. Ja sam dugo \_\_\_\_\_ bridge ali nisam ga  
uciti/nauciti

\_\_\_\_\_.

11. Moj prijatelj nije mogao da dode sa mnom u bioskop zato sto se

\_\_\_\_\_ za ispit.  
spremati/spremiti

12. Ona je \_\_\_\_\_ kada je videla svoju staru majku.  
plakati/zaplakati

13. Ova kuća je dugo \_\_\_\_\_ ali nije sasvim izgorela.  
goreti/dogoreti

14. Deco, idite u park i \_\_\_\_\_ malo.  
poigrati/igrati

15. On se \_\_\_\_\_ za vreme rata.  
bogatiti/obogatiti

Fill in the blanks with the correct verb in the correct form.

1. Vreme je da \_\_\_\_\_ spavati.  
leći/ležati

2. Molim vas, \_\_\_\_\_ mi ovaj problem.  
objasniti/objasniti

3. Vi treba da \_\_\_\_\_ svaki dan ovaj lek.  
uzeti/uzimati

4. Molim te \_\_\_\_\_ sutra kod mene.  
doći/dolaziti

5. Prestanite \_\_\_\_\_!  
vikati/viknuti

6. Ona je obecala da \_\_\_\_\_ na ovo pismo.  
odgovoriti/odgovarati

7. On stalno \_\_\_\_\_ na svoj ispit.  
misliti/pomisliti

8. Ja sam zvonila mome bratu, ali on se ne \_\_\_\_\_.  
odazvati/odazivati

9. Studenti su izisli iz razreda i \_\_\_\_\_ na sve strane.  
ići/razići

10. Ja sam star i dugo \_\_\_\_\_ ali to još nisam  
živeti/proživeti

\_\_\_\_\_!

Underline the correct word in the following sentences and make it agree with the agreement.

1. On (govoriti/progovoriti) o svome radu sa velikim zadovoljstvom.

2. Svi su zasuteli kada je on (govoriti/progovoriti).

3. On je losi učenik, on je morao da (ponoviti/ponavljati) prvi razred gimnazije.

4. Odjenom sam (osetiti/osecati) da mi je hladno.

5. Ona se zaljubila u njega (osetiti/osecati) da će ga uvek voleti.

6. Ona ga je jos uvek volela i (osetiti/osecati) da on nju ne voli.

7. Ja volim Evropu (ziveti/proziveti) sam tamo 2 godine.

8. Ona se najutila na njega i (baciti/izbaciti) iz kuće.

9. Ja ne volim da se (seliti/iseliti) ali izgleda da moram opet da se (seliti/iseliti) iz ovog stana.

10. Jabuke su (pasti/otpasti) sa drveta.

Translate the following sentences into Serbo-Croatian. Be sure to choose the aspect of the verb which conveys the situations in the sentences below.

1. Let's sit down and have a little chat.

2. Did you have a smoke this morning?

3. I put too much salt on this meat.

4. Why don't you finish eating this soup?

5. We have to surround the enemy.

6. I do not like to clean fish.

7. We have to spend the night here.

8. He presupposes that I know that.

9. Do not fill my cup to the brim.

10. She sat for hours and spoke on and on.
11. We came home and took off our coats.
12. I can't get the thoughts about the war out of my head.
13. When we arrive in Paris, we will go see the city.
14. She got so angry that she ran out of the room.
15. They stopped the car and threw their luggage in it.

## LESSON 2

### Impersonal Constructions and Generalizations

An impersonal sentence is a type of sentence in which there is no evident grammatical subject. Impersonals are not marked for subjects. Among the forms which may be grammatical subjects are a noun, a pronoun, a substantivized adjective, a participle (used as a noun) in the nominative case, an ordinal, a cardinal, a collective numeral or quantitative word in the nominative case in combination with a noun phrase in the genitive case, nouns that express quantity in the nominative case with a noun phrase in the genitive case, a noun phrase with the head noun in the nominative case, an invariable part of speech, a whole sentence, or an infinitive.

A basic grammatical sentence construction can be transformed into an impersonal construction by changing the grammatical relationship between the subject and the predicate. The construction transformed that way becomes impersonal. Usually the third person plural of the intransitive verb is replaced by the third person singular, and the reflexive pronoun se in the accusative is used even with intransitive or non-reflexive verbs. In the past tense, the verb assumes the neutral form -lo and the subject of that sentence is not expressed:

Gore su igrali do svitanja.

turns to: Gore se igralo do svitanja.

The translation of the first sentence would be:

They danced upstairs till dawn.

that of the second:

There was dancing upstairs until dawn.

or, in another example:

Dosta su jeli i pili. (They ate and drunk a lot.)

Dosta se jelo i pilo. (There was a lot of eating and drinking.)

The second sentence is definitively a generalization.

Sometimes the subject is expressed but one has to differentiate that form from the passive voice. Examples:

Vozace posebno upozoravaju na sklizak teren.

The impersonal construction would be:

Vozace se posebno upozorava na sklizak teren.

but the passive voice would be:

Vozaci se posebno upozoravaju na sklizak teren.  
(here the third person plural for the doer remains)

These impersonal constructions are very common in the Serbo-Croatian language, especially the construction without a subject.

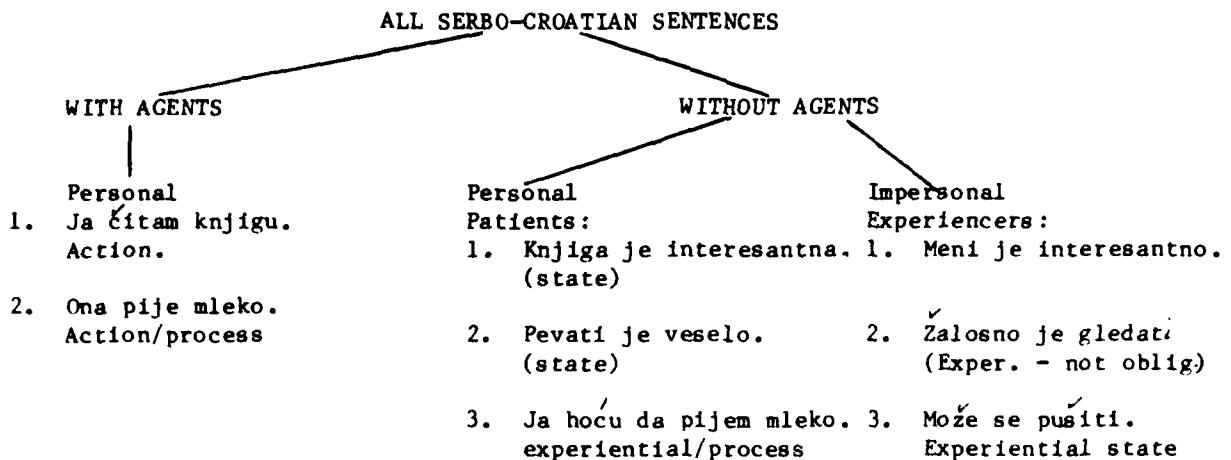

To distinguish between personal and impersonal sentences, we must discuss the nature of Serbo-Croatian sentences in general. There are two basic types of sentences: agentive and agentless. Agentive sentences contain an agent - an animate noun in the nominative - commonly known as the "doer" of the action. In the sentence: Ja citam knjigu, ja is the agent. This type of sentence is personal because there is marked agreement between the subject ja and the predicate citam. Even if the subject pronoun is deleted, the predicate is still marked for an understood agreement. If the subject is an inanimate noun and agrees with an action verb, it is commonly known as an instrument.

All agentive sentences are always personal. Agentless sentences can be either impersonal or personal. Impersonal sentences are always agentless. Impersonal sentences describe a state which may not require an experiencer noun - the person affected by the state, expressed in dative. One can say Meni je hladno with the experiencer meni stated, or just hladno je with the same concept in mind, but not necessarily implying and certainly not stating the experiencer of the state - meni. The experiencer does not have to be stated for the sentence describing the experimental state to be valid.

Some personal sentences may also be agentless, such as On je veseo. On is not performing any action. Although it refers to an animate noun, it is not an agent. On here is considered a patient pronoun. A patient pronoun combines with state verbs or with an auxiliary plus an adjective which describes a state. In personal, agentless sentences the subject always agrees with the predicate and the patient noun can never be omitted without making the sentence incomprehensible.

The distinction between personal and impersonal sentences is, therefore, that personal agentless sentences are marked for agreement between subject and predicate and must always have the patient noun present, whereas impersonal agentless sentences are not marked for agreement between the experiencer (in the dative case) and predicate (which describes an experiential state), and the experiencer does not have to be explicit to preserve the notion of the sentence.

The following diagram summarizes this.

Since the experiencer and the predicate do not agree in impersonal sentences, the predicate consists of an invariable third person neuter impersonal form. The predicate of an impersonal sentence may be:

I. a short form third person singular neuter adjective, called an ADVERBIAL PREDICATE. This morphological marker does not change regardless of the object, person, or location affected by the state described by the impersonal predicate.

Adverbial predicates describe physical surroundings and natural phenomena:

Hladno je. - It is cold.

Toplo je. - It is warm.

Vlazno je. - It is humid.

Sparno je. - It is stuffy.

Tesno je. - It is crowded.

Please note that in English, impersonals of this type are expressed by the use of "It is."

Some adverbial predicates describe physical and mental states:

Njemu je teško. - It is hard for him. (difficult)

Meni je dosadno. - I am bored.

Svima je veselo. - Everyone is happy.

Njoj je priyatno. - It is pleasant to her.

II. a third personal singular transitive, intransitive or reflexive intransitive verb (in the neuter -o forms, if it is in the past tense).

(Intransitive): Smrzavalо se u Beogradu. - It was freezing in Belgrade.

(Transitive): Mara se trese od straha. - Mara is shivering with fright.

(Reflexive): Meni se <sup>v</sup>cita. - I feel like reading.

III. a modal predicate denoting permission, obligation, necessity, prohibition or impossibility is also often used in impersonal constructions. Here are some examples:

moze se - one may, it is permitted, it is possible

ne sme se - one may not, cannot, it is impossible, it is forbidden

mora se... - one has to...

ne da se... - it is impossible...

treba... - one should, it is necessary

IV. a noun that loses its function as a noun but not its meaning. Nominal predicates are nouns which describe a state of will or convenience, convey time, or give an ethical or moral evaluation of circumstance. E.g.:

Vreme je <sup>v</sup>ici kuci. - It is time to go home.

Greh je <sup>v</sup>trositi novce. - It is a sin to spend money.

Sramota je... - It is a shame...

Tebi je muka to gledati. - It is a torture for you to see this.

In impersonal expressions these nouns lose their noun function and characteristics of grammatical agreement; e.g., gender, number. They become invariable and, in the past tense, the auxiliary verb remains in the neuter third person singular form:

Vreme je bilo <sup>v</sup>ici kuci.

Greh je bilo <sup>v</sup>trositi novce.

Tebi je bilo muka to gledati.

V. an Infinitive Predicate may stand as:

a) just a one word infinitive sentence which conveys a command:

Ustati! - Get up!

Citati! - Read!

b) with complements such as an object:

✓  
Sta ciniti? - What can one do?

Kako dospeti tamo? - How does one get there?

Depending on the context, infinitive impersonals are used with certain degrees of modality: commands, obligation, need, or rhetorical questions.

VI. a short form past passive participle in singular neuter form from a transitive verb, since only transitive verbs can provide past passive participles. The action described by the participle is assumed to have taken place and continues up to the present, unless marked for the future by bice or biti ce. E.g.:

Nama je receno doci (da dodjemo) kuci u sumrak.  
We were told to come home when it gets dark.

Odluceno je cekati kod suseda do sutra.  
It was decided to wait at the neighbor's until morning.

The above sentences have verbal complements with the impersonal predicate participle. These complements are kept in the infinitive or "da" constructions. The agent of the action can only be determined from context. In some cases the agent must be assumed to be a third person plural. E.g.

' Vec je objavljen o sastanku. - Vec su objavili o sastanku.

A large number of verbs in Serbo-Croatian are reflexive although their English counterparts are not. As we already know these verbs have the subject in the dative case. It can often be an intransitive verb used with the unstressed reflexive pronoun se. E.g.:

Covori m<sup>w</sup> se. - He likes to talk.

Spava joj se. - She likes to sleep.

Gleda im se ovaj film. - They would like to see this movie.

✓ Cini m<sup>w</sup> se... - It seems to him...

Livade se kose vise puta u godini. - The meadows are mowed many times a year.

U ratu se kuce pale. - In wartime houses are burned.\*

\*Note the passive voice in English.

As one can observe, these verbs usually indicate a certain mood or intention to act.

The sentence Nju se ne pita.

can be translated as: She is not being asked. (literally) or better:

No one is asking her.

In the following sentence

Coveka se osudjuje na smrt streljanjem.  
The man is sentenced to be shot.

we have a nominal predicate in instrumental case, and the subject in genitive case.

In the following example we have a familiar ti form of the verb often used for generalizations and the reflexive se with a non-reflexive.

Nikad <sup>v</sup>e znas gde ga <sup>v</sup> se moze naci.  
One never knows where he can be found.

On rare occasions in generalizations the reflexive se can be omitted, but the verb is definitely in the neutral form in past tense.

Another important rule to keep in mind is that when an indicative sentence is transformed into an impersonal construction in the past tense, the subject is always in the genitive. E.g.:

U zakonu su bili paragrafi na osnovi kojih su zabranjivali  
i kaznjavali stranacku aktivnost.

rendered in impersonal form:

U zakonu je bilo paragrafa na osnovi kojih se zabranjivalo  
i kaznjavalo stranacku aktivnost.

Identify the construction of the following sentences:

1. On je zaradio točno toliko novaca koliko mu je trebalo za put.

2. Ona je govorila glasno da se orilo preko ulice.

3. Marko je stručnjak <sup>v</sup> da mu nema ravna.

4. Ona je takva da su svi s njom zadovoljni.

5. Ja cu to <sup>v</sup> učiniti neka kaze ko sto <sup>v</sup> hoće.

6. Ne mogu da se setim njegovog imena da me ko ubije.

7. Koliko god radila, ne mogu si dozvoliti novi auto.

8. Oni će to učiniti makar se svi na glavu postavili.

9. Ne bi mogao biti grub da je i htio.

10. Ljudi bi ostali ovde dulje da je Vreme bilo bolje.

11. Obrati se drugima ako oni možda ne bi na to pristali.

12. Ja ču poci sam ako niko neće doci.

Identify the construction of the following sentences:

1. Najveća je zima kada se sunce radja.

2. Dijete se veseli kad se igra sa ostalom decom.

3. Govorio je se majkom dok su stajali na ulici.

4. Kisa je pocela da pada čim smo usli u kuću.

5. Nisam ga videla otkada je otisao na univerzitet.

6. Ptice odlete na jug prije nego nastupi zima.

7. Čekam dok se otvore ducani.

8. Prošlo je mnogo vremena dok sam zaradio ovu kuću.

9. Volim da živim gdje god je toplo.

10. Neznam otkuda on ima toliko novaca.

11. Nije otisao kamo su otisli ostali vojnici.

12. Ona je ostala u sobi odakle su svi ostali izisli.

Transform the following sentences into generalizations, keeping the same tense of the verb.

1. Oni ih prisiljavaju na uzmak.

2. Vagali su i dijelili meso.

3. Pucali su danonocno.

4. Oni idu u operu peške.

5. Koga god pitaju odgovor je da ne znaju.

6. Oni misle da je on dobar student.

7. Trebaju da mu kazu <sup>v</sup>to.

8. Pisali su u novinama da je on dobar predsednik.

9. Govorice o tome mnogo.

10. Dozvoliti će mu da ode iz zemlje.

11. Oni su pevali celu noc.

12. One su muzile krave.

Transform the following sentences into personal constructions.

1. Nije se videlo ko će pobediti.
2. Njemu se ne pisu pisma.
3. To se ne može verovati.
4. K jutru je zahladilo.
5. Vreme je produzeno.
6. Ne savetuje se dugo lezati na suncu.
7. Radilo bi se više da su plate veće.
8. U senatu je bilo glasano o tome.
9. Receno je da se ide kući.

10. Nama je osigurano mesto u teatru.

11. Ulica je preplavljena vodom.

12. Tamo se nije moglo živeti.

13. Ustanovljeno je da je on lopov.

14. Ovde se zabranjunje pusiti.

15. Zabranjeno je nagnuti se kroz prozor.

16. Ministru Haigu je receno Ne.

17. Pokusalo se sve što se moglo.

18. Predlog nije odbacen.

LESSON 3

The Sentence

Syntactically the sentence is the largest unit of meaning in language. The construction of a sentence is based on the choice of smaller language units: words, their forms and order.

Every sentence can have two forms, the basic one and the transformed one. This means that the content of the basic form in the transformed form does not change. The sentence transformations below illustrate the principles of basic and transformed sentence possibilities.

<u>Basic Form</u>	<u>Changed Form</u>
Potok tece.	
Potok zubori.	- can be joined by i: Potok tece i zubori.
Potok tece.	
Potok zubori.	- can be joined by changing the second verb to a <u>participle</u> : Potok tece zuboreci.
Ovde voda je mutna.	- can be changed by using the predicate adjective attributively: Mutna voda je ovde.
Pocinje leto.	- can be changed to a noun phrase by reinstating "pocinje" as a noun: Pocetak leta.
Pas trci.	- can be changed by <u>negation</u> : Pas ne trci.
Snijeg pada.	- can be changed to a <u>question</u> : Pada li snjeg?

The meaningful construction of a sentence consists of relationships between the words and the order of words in a given sentence. For example: "Ispred decak u trcati nego" shows a sequence of Serbo-Croatian words, but they do not form a coherent sentence. There are definite rules of agreement for words as well as rules for word order or "word sequencing." Both categories of rules must be observed simultaneously so that information can be conveyed meaningfully and with a minimum of obscurity. Individual words create the relationship between grammar and meaning. The choice of forms is not arbitrary. For example, one cannot say: vece je popila kava. This sentence, although the word order is correct, does not have any semblance of grammatical order, as can be observed in the underlined forms. Grammatical choices for words in a sentence depend on the verb in the sentence or clause. If a sentence contains a transitive verb, chances are that there may be an object in the accusative case; e.g., "Zaustavio je konja."

A sentence may become more semantically involved by:

- 1) the addition of a subject in the nominative case:

Jahac <sup>v</sup> je zaustavio konja.

- 2) the addition of an adverbial modifier:

Jahac <sup>v</sup> je na proplanku zaustavio konja.

Jahac je tog jutra iznenada zaustavio konja.

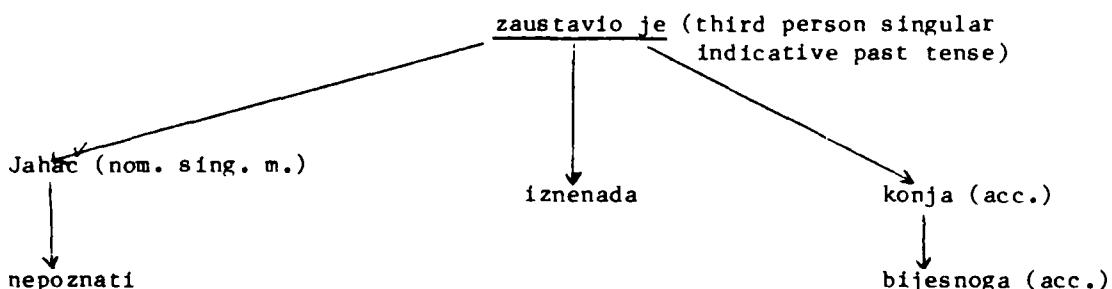

- 3) the addition of an adjective to the subject:

Ne poznati jahac...

- 4) or the addition of an adjective to the object:

...bijesnoga konja

This scheme of sentence involvement can be diagrammed as follows:

The words from which the arrows stem govern the words to which the arrows point. In any word groups there are words that determine the forms of dependent words, as is shown in this diagram.

The basic grammatical components of a sentence in Serbo-Croatian are the subject, predicate, object, and adverbial modifiers.

#### Components of a Sentence

The principal parts of a sentence are the subject and the predicate.

The subject is grammatically independent of the other sentence elements. It answers the question ko? (who) and sta? (what).

Otac je doktor.      Ko je doktor?      Otac.

Knjiga je na stolu.      Sta je na stolu?      Knjiga.

### The Subject

The grammatical construction of a sentence unequivocally requires a subject. In traditional grammars, the subject can be a grammatical one in the nominative case, or a logical one in any oblique case. Here we will deal only with the grammatical one since the latter is discussed with the adverbial modifiers in the following chapters.

The subject may be any part of speech, even a word group. It is the only truly independent member of a sentence. The subject may be expressed by the nominative case of:

a) a noun:

✓  
Covek je dosao.

b) a personal pronoun:

Oni to ne znaju.

c) an adjective:

✓  
Staro se ne vraca.

Hrabar se ne boji borbe.

d) a cardinal number:

Jedan i jedan su dva.

e) an ordinal number:

✓  
Treci nije dosao.

f) a collective number:

Dvojica su sve gledali.

g) a possessive pronoun:

✓  
Tvoji nisu dosli.

h) a definitive pronoun:

Svi su bili sretni.

i) a demonstrative pronoun:

✓  
To je bilo juce.

j) an indefinite pronoun:

Neko je kucao na vratima.

k) an interrogative pronoun:

Ko to zna?

l) a negative pronoun:

Niko to ne zna.

Nista ne znam.

m) an infinitive:

Zabranjeno je nagnuti se kroz prozor.

When an infinitive is used as a subject, it is always neuter and singular and must agree with the verb.

n) a subject can also be expressed by a word group:

1) an ent're phrase:

Decije "necu da ucim" mi je dosadilo.

When an entire phrase occupies the subject position of the sentence, it is considered neuter and singular and must agree with the verb.

2) a cardinal or collective number in the nominative case plus a noun in the genitive:

Dva vojnika su isli u rat.

Proslo je deset minuta.

Note that when a construction of this type occupies the subject position, the predicate may appear in either the singular or the plural. There is a tendency, however, to use the plural when the subject precedes the verb and the neuter singular form when the subject follows the verb; e.g.,

Pet studenata su prisustvovali na lekciji.

Na lekciji je prisustvovalo pet studenata.

In the first example, the use of the plural would seem to indicate the speaker's concern for the five individual people who make up the group of students. The use of the singular in the second example seems to indicate his concern for the group as a singular unit, rather than the individual in it. The same tendency applies with collective numerals.

Dvoje dece su dosli.

Doslo je dvoje dece.

If, however, a collective or cardinal number is used with a modifier, such as "svi," "ovi," or an adjective, the verb must be in the plural regardless of the order in which the subject and the predicate appear.

Ovo troje su zakasnili.

Ostali pet studenti <sup>v</sup> su otisli.

- 3) a quantitative adverb plus a noun in the genitive:

Nekoliko pasazira <sup>v</sup> su izasli <sup>v</sup> iz vlaka.

Iz vlaka je izislo nekolike pasazira.

Here again, the verb will appear in either the singular or the plural, depending upon the order in which the subject and the predicate appear in the sentence.

- 4) a quantitative noun in the nominative case and a noun in the genitive:

Celi red pitanja je bio resen.

Here verb agreement depends on the number and gender of the quantitative noun "red."

#### The Predicate

The predicate is grammatically dependent on the subject. It answers the questions a) sta radi? (what does the subject do) and b) sta je uradeno? (what is being done by the subject). The predicate may also complement the subject by means of verbs like biti - "to be." In that case, it answers the questions, "Kakav?" (what sort of thing is the subject), "Ko je on?" (Who is the subject), or "sto je to?" (what is the subject).

<sup>v</sup> Sta su radila deca? Oni su se igrali.

<sup>v</sup> Sta je uradeno sa kucom? Ona je prodana.

Kakva je ona devojka? Ona je lepa devojka.

Ko je bio Tito? Tito je bio predsednik Jugoslavije.

Together the subject and the predicate form the grammatical and meaningful center of a sentence. All other elements in the sentence are subordinate to them. In the present, future, and past tenses, the verb of the predicate must agree with the subject in number and person.

A predicate may be either simple or compound.

### The Simple Predicate

The simple predicate is the most common type of predicate which is expressed by a verb.

1. In the indicative mood:

a) a present tense verb:

Ja čitam knjigu.

b) a past tense verb:

Ja sam čitao(la) knjigu. (imp.)  
Ja sam pročitao(la) knjigu. (perf.)  
Ja čitah knjigu. (imp.)  
Ja pročitah knjigu. (perf.)  
Ja bejah čitao(la) knjigu. (imp.)

c) in the future tense:

Ja ču čitati knjigu. (imp.)  
Ja budem čitao(la) knjigu. (imp.)  
Ja ču pročitati knjigu. (perf.)

2. In the imperative:

Ustanite, vec je kasno! (imp.)

Dajte mi olovku. (perf.)

3. In the subjunctive mood:

Ako bih vise učio ja bih polozio ispit.

### The Compound Predicate

The compound predicate consists of two parts. These parts can be either verbal or nominal.

#### The Compound Verbal Predicate

The compound verbal predicate consists of an infinitive and an auxiliary verb in a personal form. In the compound verbal predicate, the form after "da" is considered to be the semantic center of the sentence.

Oni su hteli da spavaju.

The auxiliary part, or link, or other verb of a compound verbal predicate may be expressed by:

1. A verb in a personal form:

Mi sмо vec poceli jesti.  
Ja hocu da svrsim moje zadatke.

2. a short form adjective of state:

On je sposoban da uradi to.

3. a phrase consisting of nouns and verbs:

On je u stanju da to uradi.

#### The Compound Nominal Predicate

The nominal part or link of a compound nominal predicate may be expressed by the following parts of speech:

1. a noun in the nominative or instrumental cases:

Moj otac je lekar.  
Ona bejase detetom.  
Ja cu biti oficirom.

2. an adjective:

Ona je lepa.  
Noc je tamna.  
Stol je drven.

3. a participle:

Vrata su zatvorena.  
Ova zena je udata.

- 4) a pronoun:

Ova knjiga je moja.  
To su bili oni.  
Pobeda je bila nasa.  
Cije je ovo kaput?

5. an adverb:

Sekretarica je brza.

Zima je tu.

6. a numeral:

Pet i pet su deset.

Nas smo troje.

A compound nominal predicate can be expressed in:

the Genitive Case:

Devojčica je slaba zdravlja.

On je uvek svoje glave.

the Dative Case:

Kuća će biti tebi a novac meni.

any Oblique Case:

Pismo je od njegove majke.

Oci su bile bez sjaja.

Nedelja je za odmor.

Kuća je na brijegu.

Ona će biti u školi.

Polja su pod ledenim snijegom.

An Infinitive can occur with the linking verb "biti" in the third person singular. It implies necessity, obligation or that the action could occur.

Nikoga nije bilo cuti.

Da mi je tako ziveti.

The predicate may be a noun in the nominative where the linking verb is omitted:

Mirna plovidba.

Dobra rec.

A predicate may be also an exclamation:

U pomoc!

Evo coveka!

### Categories of the Predicate

Every predicate falls into one of these categories: I. personal, II. aspect, III. tense, and IV. mood. In the personal category are designations of the first, second and third person, singular or plural. In the category of aspect are perfective and imperfective verbs. The category of tense can be divided into: present, past and future and completed present, completed past and completed future. The category of mood contains the indicative, imperative and conditional moods.

#### I. Personal Predicates:

The choice of a personal verb ending depends on the relationship of the speaker to the person addressed and to the content of the message. The first person designates the person who is speaking.

Sg. govorim, pevam, pisem, pitao sam, (ja)

Pl. govorimo, pevamo, pisemo, mislili smo, (mi)

The second person designates the person whom the speaker is addressing.

Sg. govoris, pevas, pises, pevao si (ti)

Pl. govorite, pevate, pisete, pevali ste (vi)

The third person designates a person, idea or thing about whom (which) the speaker talks. It is neither the speaker nor the one who is addressed.

Sg. govori (on or ona), peva, pise, je pevao (la)

Pl. govore, pevaju, pisu, su pevali(le) (one, oni)

#### II. Aspect Predicates:

There are two categories of aspect:

1. Perfective - expresses an action or occurrence or state, regardless of the time in which it happened. It is to be considered a unit regardless of its duration.

Probudio se radostan.

Tako je poceo <sup>v</sup>rat!

Hoće li doci?

Ona to pomisli i ode.

2. Imperfective - describes an action, occurrence or state with regard to the tense of its happening. It should not be considered as a unit. The stress here is on its duration. This duration of action, occurrence or state can be observed in a span between its beginning and its end. It is divisible, and each part of such action has its place in time.

Ova larma traje vec <sup>v</sup>3 meseca.

On je prastao svima.

### III. Tense

When analyzing the tenses, we have to keep in mind certain grammatical factors in the categories of tense, since tenses in Serbo-Croatian do not necessarily correspond to the tenses in English. An absolute present tense is expressed only with an imperfective verb. An absolute past tense, a future, or a relative present, past, or future tense can be expressed by both aspects.

Sada je lepo.

Jesen je.

Danas je nebo oblacno.

Note: the time span in this case can be very long. In the real present tense there is no difference between the absolute and relative grammatical terms.

The relative present tense with a perfective and imperfective verb can often relate to the past. It is then called the historic present.

#### a) historic present of imperfective verbs:

Odjednom cujem glasove.

On nista ne govori zeni.

Mi cekamo a njega sve nema.

b) historic present of perfective verbs:

Včeras kada sam čitao, muha mi sleti na knjigu.  
On mirno zapali cigaretu i zaposli.

Note: The historic present is commonly used when parallel with an absolute past; e.g.,

Ustane i stade čekati.

The relative present tense which refers to future action is expressed by the use of an imperfective or less frequently, by a perfective verb. This is then called the future present.

a) Future present of imperfective verbs:

Vlak odlazi za nekoliko minuta.  
Sutra idemo u bioskop.  
U Zagreb dolaze leti mnogo turista.

b) With perfective verbs one usually finds an adverb, most "možda" (maybe):

Možda dode tvoj brat sutra.  
Možda se vidimo u nedelju.

The relative present which does not relate to the present, past or future is called the present of all tenses, and is rendered by:

a) imperfect verbs:

Kad god je zedan ja mu pruzam vodu.

b) perfective verbs:

Ponekad vas ne razumem.  
Zimi oblaci poduse planinu.

The present tense is used most often in proverbs.

Zrela kruška sama pada.  
Sit gladnom ne veruje.

A concluded present tense can be relative or absolute. It is expressed with a perfect tense, mostly with perfective verbs, since the effects of a completed action are more important than its spar in time (in that situation), the perfect cannot be replaced by the imperfect, aorist or historical present:

Ugovorio je sastanak (i sada ima obavezu).

Vojnici su zauzeli ovaj grad (i sada ga drže).

Ispruzio se na krevet (i tako lezi).

One su stigle iz daleka (i sada su tu).

If, in these examples, the past tense is replaced by the aorist, then the absolute past tense would be expressed and not the completed present tense. This is an important factor to be remembered for accurate translations.

Ugovorih sastanak. - I had made an appointment.

Vojnici zauzeše ovaj grad. - The soldiers conquered this city.

Ispruži se na krevet. - She/he stretched on the bed.

One stigose iz daleka. - They arrived from far away.

The same is true for the completed present, expressed by the past tense of perfective verbs, when the duration of the action is stressed.

Tek sam mu juče pisao (i sad je pismo na putu).

If one replaces the perfect with an aorist, the stress is more on the duration of the action as a unit in the past.

Tek mu juče pisah.

Very often in the perfect tense the link je is omitted after the enclitic se. The style then becomes smoother.

Oglasio se sa uzdahom.

Smijala se na terasi.

Nowadays the use of the imperfect and aorist is more stylistic. An absolute past is formed by using the imperfect.

Kisa pljustase.

To bijase veliki dogadjaj.

Bejah tada student.

A relative past is seldom expressed by the imperfect. It is found in proverbs and it relates to all possible tenses.

Ne pitase kad se zenjase.

The absolute past with the aorist.

Počeka neko vreme pa zakuca opet.  
Ljudi se odmakose.  
Padose jedan drugom u zagrljaj.

The aorist in the relative past can relate to the near future:

umrijeh od žedi!

Utopih se!

The aorist can relate to any tense in proverbs:

Dva losa ubise Milosa!

Nesta blaga, nesta prijatelja.

The past perfect is seldom used and indicates a complete action in the past.

The plusquam of perfective verbs:

Pricao mi je da se Marija bila rasplakala.

U ljude je bilo uslo neko nespojstvo.

The plusquam of imperfective verbs:

Oni ne bejahuzivel i tamo. (very rare)

Bejase se dosuljao kao magla.

The future tense can also indicate the absolute future and a relative future. Both perfective and imperfect verbs can indicate the absolute future tense. Here are some examples of imperfective verbs expressing the absolute future.

Dete će ići u školu.

Ko će na to cekati.

Ovako će to biti.

Perfective verbs:

Sutra cu to svrsiti.

Poci cemo u 10 sati.

The relative future, which mostly relates to the past, is used in narratives or proverbs and is called the historic future.

Pravi drug neće svog druga ostaviti u neprilici.  
Dok jesunca biti će i cveća.  
Bit će da ste ih izgubili.

#### IV. Categories of Mood

Mood can be expressed with the indicative, imperative, conditional and optative.

The indicative is also called the declarative and relates to all statements in all tenses. The imperative urges somebody to do some action. The conditional expresses a possibility. The optative expresses a desire or wish.

The imperative is always grammatically in the present tense and expresses an absolute present. E.g.

Pogledaj mi ruke!

Ustaj ne čekaj!

Neka dode!

Nemoj to da radis!

A relative present tense relates to all tenses and is used in narratives and proverbs. E.g.

Netrazi cudesa!

Posalji ludo u vojsku, pa sedi i plací.

The conditional is only connected to the present tense. It can be an absolute and relative present. The following examples are conditional I of imperfective verbs:

Sve bih sama radila.

To ne bih nikada mislio.

I ko bi znao sta će biti.

The conditional I of perfective verbs.

Sama bih konac udjenula.

Tako biste postradali.

The conditional can also express a wish.

O, kakobi se covjek želio izvuci odavde.

A wish can also be expressed by the conditional use of the modals hteti, moci, trebatи, orati, etc.

Htela bih ti pokazati.

Danas bi mogao biti petak ili subota.

An iterative conditional is also found in narratives and is used for stylistic purposes.

Kako bi jutrom odlutao, tako isto s vecera dolazio.

^  
Nista ja ne bih poduzimao.

The conditional II is connected with the completed present tense which relates to the past.

Da se je moglo, oni ne bi bili otisli.

Kako bi se bila smirila da sam joj dao to.

Here are examples of the differences in meaning of usage between the Conditional I and the Conditional II.

C II. Bili biste sigurno umakli (i sada ne biste bili tu).

Bio bi nam pucao u led'a (i sada bismo bili mrtvi).

C I. Sigurno biste umakli (sigurno biste zeleti umaci).

Pucao bi nam u led'a (mogao/zelec bi nam pucati u led'a).

The C I. examples clearly connote desire, while the C II. sentences connote concluded action.

These forms are mostly used to express a desire in the second and third persons:

^  
Zivjeli mladenci!

^  
Dobro dosli!

Vrag te odnio!

^  
Zivjela!

### Peculiarities of Subject-Predicate Agreement

#### Deletion of the Subject in personal sentences:

The subject of a sentence is often deleted in:

##### Commands

Otvori vrata.

Kazite mi to.

##### Invitations and requests

Dodite sutra.

Posaljite joj cvece.

##### Or when the subject can be determined by the verb ending

Dosao je bez kaputa. (on)

Rekle su to. (one)

Sedese u kafani. (oni)

Moglo joj je biti 10 godina. (completely deleted in age expressions)

Muka mi je od svega.

Smrkava se.

#### Collective Nouns

Collective noun ending in -ica: obojica, dvojica, trojica, sedmorica have to agree with the verb in the plural.

Obojica imaju zene.

Dvojica se stalno svadaju.

But when the helping verb biti is involved, the verb will agree with the collective noun in the singular feminine form.

Obojica su pevala.

Sestorica su zarobljena.

The collective neuter nouns: oboje, dvoje, troje, cetvero, etc., agree with the verb in the singular.

Petoro razgovara, a troje slusa.

A helping verb will agree with the collective noun in the singular neuter form:

Doslo je cetvoro.

Oboje je obuceno.

If many nouns of different genders are used together as a subject, the verb will be in the plural masculine form.

Polje, livada i vinograd su bili lepi.

If the subject is comprised of nouns of different genders in the singular, the verb may agree with the gender of the closest noun:

Poteklo je vino i rakija iz buradi.

Dosao je pionir i pionirka.

If the subject is comprised of nouns of the same gender, the verb will agree in the plural and gender of the nouns. But if they are of different genders, the gender of the verb will be determined by the closest noun.

Zaledili su se potoci i rijeka.

Celu zimu su padale kise i snjegovi.

### Secondary Parts of the Sentence

Secondary (auxiliary) parts of the sentence fall into three categories:

1. the object
2. the attribute
3. the adverbial modifier

1. The object is that part of the sentence which describes the person or thing which receives the action of the verb.

Majstor se latio posla.

✓ Sta <sup>v</sup>cita student? Student <sup>v</sup>cita novine.

Kome odgovara <sup>v</sup>ucitelj? Ucitelj odgovara studentu.

O <sup>k</sup>emu govore studenti? Studenti govore o ispitu.

Cime se bavi <sup>v</sup>as otac? Moj otac se zanima muzikom.

The predicate in the grammatical structure of a sentence often requires, with or without a preposition, a noun in some oblique case: genitive, dative, accusative, locative, or instrumental. This noun is called the object. In English, it is known as the direct and indirect object. The case is determined by the verbal governance and not by the form of the verb. If the verb governs the accusative case we have the direct object, and the verb is transitive. A transitive verb sometimes requires a direct and indirect object (dative case), but if the verb is intransitive, the dative case is not considered the indirect object. Some intransitive verbs require either the genitive, locative or instrumental case.

Some verbs require two cases: accusative and genitive, or accusative and dative, or accusative and instrumental.

Some intransitive verbs require an object in a prepositional phrase. F.g.

/  
Uzdaj se u se i u svoje kljuse.

Ne zavidi prijatelju na uspjehu.

The object is required of a particular verb and is not merely a supplement to the predicate. This is the main difference between an object and an adverbial modifier. Characteristically, an adverbial modifier can be used to replace some other words.

1. Pas se repom brani od muha.

"Repom" here is an adverbial modifier because it replaces the phrase "pomoci rapa." However, consider the following sentence:

## 2. Pas zamahne repom od radosti.

"Repom" cannot be replaced with some other words and it is the object of the verb zamahnuti. The meaning of the verb depends on the accompanying lexeme, repom.

In the first sentence, od muha is the object because it cannot be replaced by other words. In the second sentence, od radosti is an adverbial modifier since we can say zbog radosti instead.

In the sentence, "Camac se primace obali," obali is an adverbial modifier of direction, It could be expressed as: prema obali, k obali, or do obale.

In the sentence, "Radujem se prolecu," prolecu is an object required by the verb radovati se and cannot be replaced by another phrase.

All intransitive verbs then may have for verbal modifiers, while transitive verbs require objects. An adverbial modifier can be omitted and the sentence would still be complete, while a transitive verb without an object would create an incomplete sentence. F.g.

Ja sam našla...

Veselim se...

Hteo sam razveseliti...

Sunce susi...

But: "Vlak će krenuti u podne" can be rendered without the u podne.

An object can be a noun, pronoun, number, adjective used as a noun.

Sretah prijatelja.

Obradovao sam ga.

Dvojica čekaju trecega.

Dajem mladima poklone.

Some verbs require an object with a preposition. These are: izgubiti, pretjerati, ustrajati, ogledati se, oskudjevati, uživati, govoriti, misliti, debatirati, preprihati se, raspravljati, zaljubiti se, naći.

Some transitive verbs require a direct object in the accusative and a prepositional object in the locative case.

Prekinuli smo ga u poslu.

Polest ga je omela u razvoju.

In the sentence "Zahvalio sam mu na poklonu," the verb requires a dative (mu) and na poklonu (accusative) as a prepositional object.

## 2. The Attribute

The attribute identifies a quality or property of an object. It answers the questions kakav/kakva/kakvo (what kind of), čiji, čija, čije (whose), koji, koja, koje, (which).

Kakvu knjigu čita student? Student čita interesantnu knjigu.

Čiji je ovo rečnik? To je rečnik učitelja.

U kojem redu sedi ona? Ona sedi u prvom redu.

Kakva je ona devojka? Ona je lepa devojka.

## 3. Adverbial Modifiers

Adverbial modifiers indicate the place time, cause, manner, or purpose, quantity or direction of an action. They answer the questions:

gde  
kuda  
otkuda  
kada  
kako dugo  
ot kada  
do kada  
kako  
zasto ✓  
zbog cega  
iz kakvog razloga  
koliko

### Place

Gde si bio juče? Ja sam bio u školi.

### Time

Kada počinje čas? Čas počinje u 8 sati.

### Direction

Kuda idete? U školu.

### Cause

Zasto niste došli? Mi nismo došli zbog kise.

### Manner

Kako ide vas sat? Moj sat ide dobro.

### Purpose

Zasto ides u dučan? Idem po novine.

### Quantity

Koliko studenata imate? Imam vrlo mnogo studenata.

All words that answer a question are parts of the sentence. Words like prepositions, conjunctions or particles are not parts of a sentence because no questions can be answered by them specifically. Sometimes they will be included as parts of a sentence if they are coupled with another word.

The adverbial modifier can be expressed by an adverb, prepositional phrase, case expression and particle.

Adverb: Danas bi moglo biti kise.

Stoga su se deca razisla.

On je naglo izišao iz kuće.

I tu je počela tragedija.

### Prepositional Phrase:

Seljaci su obavili poslove u polju prije zime.

Dati cu ti novac do subote.

Učenici se vracaju iz škole.

Juce sam na ulici sreo prijatelja.

Covjek je pred vratima zastao.

Oma je s ponosom pogledala na svoje dete.

Pas je skocio u reku.

Ivan je otputovao k sestri.

A case expression consists of a noun and an attribute. With the genitive it expresses time. E.g.:

Tog dana on nije dosao u školu.

Svake noci ona dolazi kasno kući.

Prosle nedelje smo bili na izletu.

Trećeg dana je sve prošlo.

In the dative case the adverbial modifier can indicate.

Direction of the verb:

Svaka ptica svome jatu leti.

Vrana vrani oči ne kopa.

Išao je svome bratu.

Intention of the action:

Otac je sinu sagradio kucu.

Sebi oreš, sebi sijes, sebi čes i žeti.

A logical subject indicating the performer of the action in the dative case (impersonal constructions):

Ne ide mi se u vodu.

Covjeku je zao deteta.

Majci se spava.

In the accusative case, a case expression consists of a noun or a noun and attribute. It indicates a time element.

Kisa je padala celu noc.

Treci dan su otisli.

Sunce se videlo još za trenutak.

In the instrumental case an adverbial modifier may indicate:

Means by which an action is performed:

Pisem crvenom olovkom.

Vozim se automobilom.

Dobar uspeh se postizava marljivošću.

Udarí ga loptom po glavi.

Location:

Trzaj prode vlakom.

Vetar je duvao uvalom.

Time element:

Nema ga da dođe danima!

Godinama je nisam video.

Manner:

Isao je sitnim koracima.

Gledala je zalosnim očima.

Teskom mukom sam to svrsio.

Indication of an instrument by which something is done or which does something:

Gradovi su opasani zidinama.

Ljudi su nervozni, obuzeti strahom.

Bio je i sam potresen njenom tugom.

A particle can express a stressed action:

Bas sam se odmorio.

Lijepu li smo devojku videli.

Položio si dakle ispit.

A double adverbial usage can enforce or diminish an action.

Decak je sve vrlo brzo naucio.

Vlak je nekako sporo primicao stanici.

Tek jučer je prestala padati kisa.

Jos i sada drhti.

Determine what type of subject is each of the following sentences.

1. Pokazite mi put.
2. Pevale su u sumi celi dan.
3. Razmisljase o prošlim vremenima.
4. Moglo im se na licu videti.
5. Ne da mi se čekati na njega.
6. Treba im pomoci.
7. Eto, sad je bolje.
8. Lete niza stijene i ne zaustavljaju se.
9. Trese me groznica.
10. U njoj se javi radoznalost.
11. Nesto se u selu dogada.
12. I onda se dogodilo najstrasnije.
13. Bratovo je i moje.
14. Micije je svaciјe.

Identify the type of compound predicate in each of the following sentences.

1. Oni su poceli da piju.
2. Ja ne mogu to da uradim.
3. Ona je premlada da se uda.
4. Vrata su staklena.
5. Njih je petoro u automobilu.
6. Pobeda će biti nasa.
7. Cija je ovo kuća?
8. On će biti prvi u školi.
9. Daleko nam je do njega.
10. On je jako ljen.
11. Nikoga nije bilo tamo videti.
12. Zdravo!
13. Ne može se tako raditi.

Determine the mood, tense and aspect of the predicate of each of the following sentences.

1. Oni placaju njene racune.
2. Ovo dete progovori vrlo rano.
3. Neka on kaže sto misli.
4. Ja cu uloviti mnogo riba danas.
5. Kada bih samo polozio ovaj ispit!
6. Vojnici bejahu vrlo hrabri.
7. Donesite mi flasu vina.
8. Dodoh, videh, pobedih.
9. Požuri mi smo vec zakasnili na predavanje.
10. Ja budem spavala dugo.
11. Ti si pred vratima zastala.
12. On će doci veceras na sastanak.
13. Obala je bila opustjela.
14. Brodovi su potopljeni u okeanu.

Underline the subject in each of the following sentences and determine what type of subject it is.

1. Moji su na putu.
2. To su sve glupi ljudi.
3. Tesko je misliti o tome.
4. Dvoje dece danas nema u skoli.
5. Ko nije pojeo svoje meso?
6. To me se nista ne tice.
7. Prošlo je deset godina od kada sam ga videla.
8. Neko, će platiti za ovo.
9. Svi misle samo na sebe.
10. Mora nesto da se uradi.
11. Ovo dvoje nisu muz i zena.
12. Mnogo problema nije rešeno.

## LESSON 4

### Word Order

Word order in Serbo-Croatian is more flexible than in English. Therefore, the possibilities for expression are greater. Emphasis and shades of meaning can be expressed by manipulating word order.

Normal word order in Serbo-Croatian is subject-verb-object. This word order is stylistically neutral. E.g.

Vetar nosi lisce.  
S V O

On izvadi sat.  
S V O

In exclamations the predicate occurs in the first place.

Evo brata! - Here is the brother!  
P S

Eto izvora! - There is the well!  
P S

Adverbs normally occur before predicate verbs.

Ona bojazljivo otvorila oci.  
S V O

If an adverbial modifier is a prepositional phrase, it stands after the predicate.

Djed je otisao u polje.

Ozenio se nakom tri meseca.

Kaput mu se vuce po podu.

In complex sentences all attributes, appositions and modifiers stand in front of the words they modify. Adjectives always stand before the noun they modify.

nova skola  
prva knjiga  
izgazena trava

Prepositional phrases and adverbs of place (odavde, odande, otuda, slijeva, etc.) stand after the word they modify.

dijete bez roditelja

susjed slijeva

pas sjajne drake

In geographical terms which involve modifiers, the modifiers will occur before the noun they modify.

Crna Gora

Novi Sad

✓  
Slavonska Pozega

But, in official titles or in nicknames, the modifier frequently follows the noun which is modified:

Ivan Grozni

✓  
Richard Treci

Karlo Veliki

In English the article "the" follows the name.

Richard the Third

Ivan the Terrible

Appositions may occur before or after the noun they modify:

Gradi se cesta oko grada Zagreba.

On je siromah primio dosta udaraca.

Adverbial modifiers stand after the predicate:

✓  
Sava teče mutna.

✓  
Ostao je neutesen do smrti.

In independent complex sentences which are stylistically neutral; i.e., sentences which follow normal word order rules, the subordinate clause usually follows the main clause. E.g.:

Ucinite tako kako smo se dogovorili.

Sve možes' reci njoj koja te voli.

Zatrese glavom, istrese kapljice.

Vec sam vam rekao da ne mogu ostati.

In these sentences you should remember that the conjunction always introduces the dependent clause.

All dependent clauses except clauses of manner, clauses of comparison and clauses of result may be put in front of the main clause for emphasis. E.g.

Kako si ko prostre, onako ce i spavati.

Ako to niste vidjeli, niste nista videli.

Kuda vojska prode, tu trave ne raste.

In direct discourse the predicate stands right after the quotation marks, like in English:

"Doci cemo," rekose svi u isti glas.

But if the sentence in quotations follows the main clause, regular word order occurs.

Svi rekose u isti glas: "Doci cemo."

Vocatives and modal words have completely independent positions.

Ja to, brate, ne mogu uciniti.

Vi ste, dakle, odbili ponudu.

For the purpose of emphasis, word order is often stylistically changed to an atypical error. A word appearing in an unusual position will attract attention.

#### Position of the Subject:

The subject is often placed at the end of the sentence for emphasis.

Zvonio ti je Ivan.

The word order is especially common at the beginning of a narrative. Special attention should be given to word order in sentences with enclitics. An enclitic is a word or particle, without the independent accent, which depends on the preceding word. Examples of enclitics are: the short forms of personal

pronouns, the reflexive se, short forms of helping verbs (sam, si, je, smo, ste, su, or ce, cemo, etc.), the connective enclitic li in questions, or the bi - forms in the conditional mood.

If a compound tense is used, the helping verb in enclitic form is in the second place, after the subject. The adverb stands between the helping verb and the infinitive or participle.

Snijeg je lagano sipio.

Kisa <sup>r</sup>ce <sup>v</sup>nucas prestat.

The enclitic can also be placed between the attribute and the noun:

Tih je vetric mrsio kose devojke.

Vasa <sup>v</sup>su <sup>r</sup>mi naklapanja dosadila. or

Tko bi god jeo te jabuke, razboleo bi se.

Enclitics cannot be placed at the beginning of a sentence, nor after the negative adverb ne, nor conjunctions i and a:

Zvonili ste?

Govorili bi da su znali.

#### Position of the Object

The direct object will often appear as the first element in a sentence to indicate that it is first in the speaker's mind.

Ovu <sup>r</sup>novu <sup>v</sup>knjigu citam sa uzivanjem.

In impersonal sentences, the indirect object in the dative case, which expresses the logical subject, often precedes the predicate.

Meni je dosadno.

Njoj je lepo tamo.

Please note that all impersonal sentences are considered to have a typical word order because they have no subject.

In generalized personal sentences the direct object will precede the predicate.

Njega su zatvorili.

### Position of the Attribute

The further away the attribute stands from the noun it is modifying, the greater is the emphasis.

It may appear in the beginning of the sentence:

✓  
Odlicnu ste izabrali knjigu.

✓  
Prekrasna je ona zena.

It can appear on the end of the sentence for special emphasis:

✓  
Covjek je on bio hrabar.

Emphatic words like:

✓  
bas, ipak, samo, narocito

emphasize the atypical word order.

A verb enclitic also cannot be at the beginning of a sentence unless it stands with the particle li. All questions have this word order:

✓  
Je li vam je tesko?

Je li je on dobar?

Da li ste videli to?

In dependent clauses enclitics stand right after the interrogative and relative pronouns:

Ne ide nikuda jer je ljen.

✓  
Znate li sto nas muci?

The kind of enclitic also determines position. After an accented word, the connecting enclitic li comes first. Verbal enclitics are in second place and pronominal enclitics in third place:

1      2      3      ,  
Pitam se da li cete mu vi pomoci.

1 2 3  
Ne znam da li bi ga prepoznali.

The verbal enclitic je stands after the pronominal enclitic:

1      2  
Vidio ga je samo jedanput.

1      2  
Ona nam je poslala novaca.

After verbal reflexive enclitics the je is usually omitted:

On se smijao.

NOT: On se je smijao.

Tresao se od straha.

NOT: On se je tresao od straha.

In a sentence with many pronominal enclitics next to each other, the cases determine the word order. First is the dative, next the genitive, and then the accusative:

Roditelji su mi ga poklonili.

dat. acc.

Omladinci su nam ih izgradili.

dat. acc.

Zao mi ga <sup>v</sup>je.

dat. gen.

The same rule applies with the se or reflexive verbs:

On joj <sup>v</sup>se nasmesio.

dat. acc.

Djeca su ih <sup>v</sup>se nagledala.

gen. acc.

These rules about enclitics must be followed regardless of style or emphasis, in simple as well as in complex sentences.

The negative particle ne or ni stands before the predicate. If it contains a compound tense, ne stands right before the enclitic:

ne bih verovao, ne bijase cuo, nije odustao.

The ni always stands in the middle of the compound preposition:

Ni od koga.

instead of: od nikoga.

To se ne prodaje <sup>v</sup>ni za sto. instead of: za nista.

Because non-native speakers make most of their mistakes in the use of enclitics, you must learn these rules.

### Definite and Indefinite Articles

Although Serbo-Croatian does not have a definite or indefinite article, you can still distinguish between "the" and "a" by manipulating word order.

Most sentences contain two types of information: given, or old information, and new information. The new information is essential to the sentence, for it is the reason for the sentence. When new information is introduced, people tend to place it at the end of the sentence. Once this information has appeared, it will not normally appear at the end of the sentence unless the speaker wishes to emphasize it. Let us compare the two following sentences:

Stara zena je otvorila vrata. - The elderly woman opened the door.

Vrata je otvorila stara zena. - An elderly woman opened the door.

In the first sentence this elderly woman must have been mentioned before. She therefore becomes "the elderly woman." In the second sentence, however, "elderly woman" stands at the end of the sentence and must, therefore, be new information. So we translate it with "an elderly woman." (A very significant rule for translations.)

Read the following sentences and state whether the word order is typical or atypical. Indicate what word is being stressed. Change the existing word order to the other possibility.

Nas ti ne razumes. \_\_\_\_\_

Nju je probudila velika larma. \_\_\_\_\_

Juce je on dosao u Beograd. \_\_\_\_\_

Ja cu ti pokazati sliku. \_\_\_\_\_

Njega je poslao otac. \_\_\_\_\_

Mi cemo biti tamo. \_\_\_\_\_

Neobican je bio ovaj film. \_\_\_\_\_

Vreme oni provode bez svakog rada. \_\_\_\_\_

Ja se ne secam prvog mog dana na poslu. \_\_\_\_\_

Da on nece doci sam znala. \_\_\_\_\_

Dolazio je taj covek! \_\_\_\_\_

Njima je vrlo lepo tamo. \_\_\_\_\_

Kriminalno je ovo drustvo. \_\_\_\_\_

Braca su im ih poslali. \_\_\_\_\_

Ovog slikara zaista volim. \_\_\_\_\_

Jer je prozor zatvoren prostorija je zagusljiva. \_\_\_\_\_

Ponese i vrecu mada je bila poderana. \_\_\_\_\_

Baka je volela unuciće i rado im je donosila slatkiše. \_\_\_\_\_

Knjigu koja je nestala cemo naci.

---

Gotovo svaki dan kisi.

---

Cvjet ce ovaj procvjetati sutra.

---

Kad bi samo njegova majka bila ziva, koliko bi se radovala.

---

Njega ko pobedi, taj je junak.

---

Snijeg je zapao vec u novembru, sto je bilo vrlo neobicno.

---

## LESSON 5

### Syntax

An analysis of sentences and clauses in Serbo-Croatian will help you to understand the structure of the language and improve translation skills.

#### Classification of Sentences According to Meaning:

Serbo-Croatian has four basic kinds of sentences:

DECLARATIVE: Ja sam dobar student.

IMPERATIVE: Budi dobar student.

INTERROGATIVE: Da li sam dobar student?

EXCLAMATORY: Tako dobar student!

Sentences may also be classified according to the number and kind of clauses they contain. Usually four types are found.

#### I. Simple Sentences

#### II. Compound Sentences

#### III. Complex Sentences

#### IV. Compound-Complex Sentences

#### I. Simple Sentences

A simple sentence is a sentence containing one main clause and no subordinate clauses:

Otac radi.

Jugoslavija je Narodna Republika.

A simple sentence can contain two or more verbs joined by a coordinate conjunction:

Petar je ustao i polako izisao iz sobe.

If a sentence has two coordinated subjects, it is still a simple sentence:

Marija i Ivo su sedeli i gledali televiziju.

A sentence will become complex or compound only when each verb has its own subject.

## II. Compound Sentences

A compound sentence consists of two or more main clauses. Two main clauses in compound sentences are most often connected by coordinated conjunctions:

Prosao je trenutak i vlak je krenuo.

Nisi junak, niti te je junak rodio.

The second clause in each of the sentences above is independent of the first clauses. Dependent clauses occur in sentences like:

Dosao sam na vrh planine kada je svanulo.

Independent compound sentences can be joined by:

a) Coordinate conjunctions:

i, pa, pak, te, ni, niti

Devojka sedi kraj mora pak sama sebi govorí.

Nismo ga ni videli ni culi.

Noga mu se izmakla I on pad ne na snijeg.

b) Adversative conjunctions which occur in sentences where the clauses contrast with each other in content.

a, ali, nego, no, vec, pa, pak, dok, kad, samo

Ona je radila, a ja sam <sup>v</sup>citao novine.

On je slušao, ali nije mogao da razume.

Jutrom je mrak još podnosišljiv ali navecer nikako.

Seljaci su se isprva grozili no napokon se umirise.

Mati nije krenula s njime na put vec je ostala kod kuće s decom.

Plan je dobar samo ga mi sada ne <sup>v</sup>mozemo prihvati.

Upravo smo se spremili na odmor kad eto ti njega opet na vratima.

The independent clauses comprising these sentences can stand separately as complete thoughts.

- c) Disjunctive conjunctions join two independent clauses into one sentence and convey the distributive meaning of "either..., or." In Serbo-Croatian the main disjunctive conjunction is ili.

Ili ti ne goviris pravilno, ili ja ne cujem dobro.

Drug ce nam doneti knjigu ili ce je poslati.

Put se pred njima neprestano prosirivao ili se put pak naglo suzavao u gotovo neprohodnu stazu.

Sve te suprotnosti su bile jos vise zaostrene ili su poprinule nesto drukcije oblike.

If the sentence has two different subjects, the clauses have to be separated by a comma, as is the case in the first example.

- d) Exclusive conjunctions convey the meaning of exclusion, "except." They are:

samo, samo sto, tek, tek sto, jedino

The clauses joined by these conjunctions must be set off by commas.

Sve je bilo divno, samo vreme nije.  
(Everything was great except the weather.)

On je dobar covek, samo piye mnogo.

Ovde je lepo, jedino vreme nije.

Tek sto sam dosla, dete je pocelo plakati.

- e) Conclusive conjunctions convey a result expressed in the clause containing the conclusive conjunctions:

dakle, zato, stoga

The clauses joined by these conjunctions are set off by commas.

Naucio sam zadacu, zato cu se odmarati.  
(I learned my homework, (and) therefore I will rest.)

Ustala sam kasno, stoga cu zakasniti u skolu.

On sada ne radi, zato nema novaca.

Juce nisi ucila, zato moras danas mnogo uciti.

The position of the subordinate clause in the construction of compound sentences determines what type of sentence it is. There are five basic types:

- I. Subjunctive Sentences
- II. Predicative Sentences
- III. Attributive Sentences
- IV. Objective Sentences
- V. Adverbial Sentences

### I. Subjunctive Sentences

In subjunctive sentences, the dependent clause answers the question who or what? and replaces the subject with pronouns.

Taj marljivo radi. Taj <sup>ce</sup> biti nagradjen. =  
Tko marljivo radi biti ce nagradjen.  
 (Whoever works hard will be rewarded.)

If a sentence has a demonstrative pronoun as the subject of the first clause and the pronoun subject refers to the demonstrative pronoun in the second clause, both demonstrative pronouns can be deleted and replaced by an interrogative pronoun in the first clause. E.g.

Taj rano rani. + Taj dvije sreće grabi. =  
Ko rano rani, dvije sreće grabi.

Other examples are:

Ko ne poznaje zakona vrsi nasilje.

✓ Sto je bilo dole sada je gore.

Onaj ne ljubi manje. + Onaj mnogo suti. =  
 Ne ljubi manje ko mnogo suti.

Taj nema slobode. + Taj o slobodi sanja. =  
Ko slobode nema taj o slobodi sanja. (In this example the taj of the second clause is not omitted.)

The demonstrative to occurs in impersonal expressions in the da clause, which expresses speech, thought and feeling.

Danas je nedelja. Po svemu se to oseca.

Po svemu se oseca to da je danas nedelja.

Po svemu se oseca da je danas nedelja.

These subjunctive sentences are called declarative.

Istina je da cudesa nema.

Sramota je da ne niko nije odazvao pozivu.

Priča se da ni u vas vino nije lose.

These sentences originate from:

To je istina. Cudesa nema.

To je sramota. Niko se nije odazvao pozivu.

To se priča. Ni u vas vino nije lose.

The conjunction da will sometimes be repeated when joining more than three independent sentences.

To se pretpostavljal. + Niprijatelj je slab. +

To se pretpostavljal. + Neprijatelj će brzo popustiti. =

Pretpostavljal se da je neprijatelj slab, da će brzo popustiti.

In addition to da, kako and gde are used as connectors in the dependent clauses.

Odmah se doznalo kalo im finansijsko stanje nije mi najmanje dobro.

The sentence is a compilation of the following independent sentences.

To se odmah doznalo. + Finansijsko stanje im nije mi najmanje dobro.

Jasno se čulo gde ga majka opominje. = To se jasno čulo + Mati ga opominje.

A dependent clause can be added to a main clause by using the relative pronouns kaq sto, koji, čiji, kakav, kolik as conjunctions.

To se ne zna. + Tada dolazi ministar. = Ne zna se kada dolazi ministar.

Knjiga je na stolu. + Cija je to knjiga. = Cija ne ovo knjiga tamo na stolu.

Ko to zna. + Kakav je to čovek. = Ko zna kakav je to čovek.

Vidi se to. + Taj dečak dobro naprednje. = Vidi se koji dečak dobro naprednje.

Pronominal adverbs such as gde, kamo, kuda, otkuda, odakle, kada, otkada, dokada, kako can be used to connect subordinate clauses to main sentences; e.g.,

To se vidjelo. + Ondje će avion sleteti. = Vidjelo se gdje će avion sleteti.

To se prepostavlja. + Tamo vetar puse. = Prepostavlja se kamo  
(kuda) vetar puse.

To se ne cuje. + Odakle dolazi auto. = ne cuje se odakle dolazi auto.

To se ne kaze. + Tada se to dogodilo. = Ne kaze se kada se to dogodilo.

To se zna. + Otada ona ima prvo novaca. = Zna se otkada ona ima prvo  
novaca.

The verbs used above express acts of speech, thought and feeling.

## II. Predicative Sentences

These are sentences which modify the subject and replace an adverbial predicate--the predicate being the part of a sentence or clause that expresses something about the subject and consists of a verb with or without objects. Predicative sentences are introduced by the conjunction words:

ko, sta, kakav, takav, or ciji

(Ko je gazda?) Gazda je ko se trudi.  
A master is the one who works.

(Kakav si bio?) Kakav si bio, takav ces i ostati.  
As you were, so shall you remain.

(Kakva je bila magla?) Magla je bila takva, da se nije videlo ni korak  
pred sobom.  
The fog was such that you couldn't see a step  
ahead of you.

(Kakav sam bio?) Kakav sam bio takav cu ostati.  
I shall remain the same as I was before.

The conjunctions da and da bi are used to join a subordinate predicate clause to main clauses. Da is used to indicate a consequence brought about by the information of the first sentence. It is used when takav is in the first clause.

Kisa je takva da se ne moze izaci.  
The rain is such that one cannot go outside.

Tvoj rad je takav, da smo njime vrlo zadovoljni.  
Your work is such that we are very satisfied with it.

In the main clause the pronoun takav functions as the predicate to the noun rad which is described in the dependent clause. Therefore, "tvoj rad je takav..." is a predicative clause.

Da bi indicates a consequence brought about by the main clause and is used when ne takav is the predicate of the main clause.

Kisa nije takva, da se ne bi moglo izaci.  
The rain is not such that one couldn't go out.

\*\*Note the need for the past tense of the predicate in the clause in which da bi appears.

Note the similarity in structure of the subordinate predicative clause introduced by da and da bi and that of the attributive subordinate clauses introduced by da:

Kisa je takva da se ne moze izaci.  
(A predicative clause with da modifying the predicate takva.)

Lije takva kisa, da se ne moze izaci.  
(An attributive clause modifying the demonstrative adjective takva.)

### III. Attributive Sentences

These are sentences which answer the question who? or which? modifying a noun in an attributive sentence; e.g.,

Posjetili smo druga koji je obolio.  
We visited a friend who got sick.

The meaning of the sentence would not change if we would use a past passive participle construction.

Posjetili smo oboljelog druga.

When a sentence relates to a noun or pronoun of a previous sentence it becomes a relative clause. Because of its construction and meaning, it is also called attributive because it modifies that noun or pronoun. It is connected to the main clause by the relative pronouns:

koji, koja, koje, cija, cije, ciji, sto, kakav, kakva, kakvo

or by the adverbs:

gde, kamo, kuda, otkuda, kad and da.

#### Examples:

Svaki covek ima neku slabost. + Slabost se moze pretvoriti u strast. =  
Svaki covek ima neku slabost koja se moze pretvoriti u strast.

Onaj ce dobiti nagradu. + Onaj je najbolji u razredu. =  
Nagradu ce dobiti onaj koji ne najbolji u razredu.

If a perfect which denotes a concluded present is used in the main clause, the future exact has to be used in the attributive sentence; e.g.,

Ja necu nikad prevariti onoga. + Onoga sam ljubila. =  
Ja necu nikad prevariti koga budem ljubila.

Often the koji can be replaced by sto:

Ona je obrisala suze sto su joj dosle na oci.

Dovrsili smo posao sto smo ga juce zapoceli.

If a relationship of possession or belonging exists between the two clauses, the linking conjunction will be ciji, cija, cije; e.g.,

Svratio sam prijatelju. + Kuca pripada prijatelju. + Kuca se nalazi na uglu.  
= Svratio sam k prijatelju kojemu pripada kuca. +  
Svratio sam k prijatelju kojemu pripada kuca koja se nalazi na uglu.  
= Svratio sam k prijatelju cija se kuca nalazi na uglu.

The genitive of koji can often replace the pronoun ciji; e.g.,

Upoznali smo coveka. + Srce pripada coveku. + U srcu gori ljubav prema narodu.  
= Upoznali smo coveka u srcu kojega gori ljubav premo narodu.

If two sentences have takav as their subjects, one of them will be replaced by kakav in the same gender, number and case. The kakav sentence will take first place and the takav in the second sentence may be omitted because the kakav of the first sentence conveys the implied takav.

Ucenicima je pripala nagrade. + Ucenici su nagradu zasluzili. +  
Nagrada je takva.  
= Ucenicima je pripala nagrada koja je takva.  
= Ucenici su zasluzili nagradu koja je takva.  
= Ucenicima je pripala takva nagrada. Takvu nagradu se ucenici zasluzili.  
= Ucenicima je pripala takva nagrada kakvu nagradu su zasluzili.

And finally:

= Ucenicima je pripala nagrada kakvu su zasluzili.

The following sentences illustrate connecting adverbs as clausal conjunctions.

Sazidali su kuću. + Tamo se nalazio bunar. =  
Sazidali su kuću gde se nalazio bunar.

Idem u školu. + Tamo je isla i Ana. =  
Idem u školu kuda je isla i Ana.

Ja sam bio tamo. + On je tada dosao. =  
Ja sam bio tamo kada je on dosao.

Ja to znam. + On to nezna. =  
Ja znam da on to nezna.

#### IV. Objective Sentences

Dependent sentences which complement verbs requiring odd cases; i.e., not nominative, are objective sentences since they usually modify the direct or indirect object; e.g.,

Radnici obecavaju da ce unaprijediti proizvodnju.  
(The workers promise to raise their productivity.)

✓ Sta obecavaju radnici? The answer is the direct object (da ce unaprijediti proizvodnju). This holds true since we can express the same in:

Radnici obecavaju unapredjenje proizvodnje.

Unapredjenje is the direct object in this sentence.

An object clause which is connected to the main clause by means of the conjunction da usually involves:

Verbs of speech: Receno mu je da o tome ne govori.

govoriti  
kazati  
pričati  
obecati  
uvjeravati

Verbs of thought: Mislim da on sv^ razume.

znati  
verovati  
zaboraviti  
padati se

Verbs of feeling: Hocu da sutra dodjes.

✓  
cuti  
videti  
gleđati  
slusati

The connectors for object clauses are da, kako, or gdje. Sometimes the da connector may be omitted and the infinitive used without any change in meaning; e.g.,

✓  
Covjek je sposoban da savlada prirodom.

Covjek je sposoban zavladati prirodom.

## LESSON 6

### COMPLEX SENTENCES

#### Adverbial Clauses

Some types of complex sentences are composed of a main clause and an adverbial clause. Adverbial clauses modify a verb, an adjective, an adverb or another clause. They can be categorized semantically as:

Clauses of Time	-	Vremenska
Clauses of Space	-	Mjesna
Clauses of Manner	-	Nacinska
Clauses of Purpose	-	Namerna
Clauses of Result	-	Posledicna
Clauses of Concession	-	Dopusna
Clauses of Comparison	-	Poredbena
Clauses of Cause	-	Uzrocna
Clauses of Condition	-	Pogodbena

Usually adverbial clauses appear at the beginning or the end of the main clause. They are introduced by subordinate conjunctions; e.g.,

,

Nemoj doci dok nismo spremni za tebe.  
(Don't come until we are ready for you.)

### Clauses of Time

Like corresponding simple adverbs, adverbial clauses of time answer the question when? The connecting words are usually:

kada, dok, dokle, kako, otkada

They indicate when the action of the main verb is performed. The relation of the action of the main verb to the action of the subordinate clause can be stated in three perspectives:

The action of the two verbs can be:

1. Simultaneous. This relationship is connected with adverbs:

kada  
dok  
dokle  
kako  
otkada  
odonda  
odsada

Prosla su tri meseca kako radimo na istom poslu.  
(It's been three months now that we've been working on the same job.)

This sentence originates from:

Sada su prosla tri meseca. + Sada mi radimo na istom poslu.

The use of kako as a time identifier joins the two sentences as well as subordinates the action to the time phrase.

Analyze the following examples in which the same time conditions exist:

Nije se protivila kada sam joj dao cvece.

(Originally from: Nije se protivila tada. + Tada sam joj dao cvece.)

Podupirati cu ih dok mi je daha. =

Podupirati cu ih dotle. + Dotle mi je daha.

Mati se brine o deci dok god zivi. =

Mati se brine of deci dotle. + Dotle mati zivi.

In the following examples, the time perspective is more exact:

Sav se promet tuda otkada su nacinili most. =

Otada se sav promet kreće tuda. Otada su nacinili most.

Prosla je vec godina, dana kako se nismo videli. =

Odonda je prosla vec godina dana. + Odonda se nismo videli.

2. Action after the action of the dependent clause.

The adverb of time, odmah, indicates action immediately after the action expressed by the verb of the main clause and can be replaced by:

čim, dok, kako, tek sto, tek, istom, posto, proje, no sto.

On je skocio s kreveta čim je otvorio oči. =  
On je skocio s kreveta. + On je odmah otvorio oči.

Moraju se rastajati tek sto su se sastali. =  
Moraju se odmah rastajati. Odmah su se sastali.

Kad budeš razumeo bice vec kasno. =  
Tada si razumeo. + Tada će biti kasno.

Otici cete u setnju posto napisete zadacu. =  
Otici cete u setnju. Odmah napisite zadacu.

Prijatelja čusmo prije no sto ga ugledasmo.

Ptice odlete prije nego nastupi zima.

3. Action before the action of the dependent clause.

Sentences which have a perfective verb in the second clause and a perfective or imperfective verb in the first clause indicate that the action of the dependent clause occurred before the action in the main clause.

Conjunctions for this type of temporal adverbial clause are:

prije nego, and prije no sto.

Dodjite prije nego je kasno. + Dodjite tada. + Tada nije kasno.  
(Come before it is too late.)

Ptice odlete prije nego nastupi zima. =  
Vec tada ptice odlete. + Vec tada nastupi zima.

S prijateljima ču živeti kad svi oni odu. =  
S prijateljima ču živeti onda. + Onda svo oni odu.

Ruža vene kada se ubere. =  
Ruža vene tada. + Tada se ubere.

### Clauses of Space (Mjesna recenica)

Adverbial clauses of space again like the corresponding adverbs answer the question where? or where to? or how far? The connecting adverbs are:

gde, ovde, tu, onda, kamo, kuda, otkuda, odakle, dotle.

Gde su bila pusta polja, izrasle su nove tvornice.  
(Where there were empty fields now there are factories.)

= Ovde su bila pusta dolja. + Ovde su izrasle nove tvornice.

Odakle god dosla, uvek si dobrodosla.  
(Wherever you came from, you are always welcome.)

= Odakle god dosla. + Tu si uvek dobro došla.

Analyze how the following sentences are combined into clauses of space:

Brat je otisao onamo. + Onamo su brata zvali. =  
Brat je otisao kamo su ga zvali.

Pratili su ih dovde.\* + Dovde su im sljedili trag. =  
Pratili su ih dotle su im sljedili trag.

\*Dovde is almost synonymous with dotle, dovde, and donde. Dotle and dovde are interchangeable.

Nova će cesta uglavnom prolaziti tuda. + Tuda je prolazila stara cesta. =  
Nova će cesta uglavnom pralazili kuda je prolazila stara cesta.

### Adverbial Clauses of Manner (Nacinska recenica)

If the adverbs ovako, tako or onako are used in two sentences to describe that two actions are done in the same manner, they may be joined by the conjunction kako which semantically replaces those adverbs; e.g.,

Pri tome nije zaplakao tako. Tako to <sup>v</sup>cine druga deca.

The union of these two sentences may take the syntactic shape of:

Pri tome nije zaplakao tako kako to <sup>v</sup>cine druga deca.

-OR-

Pri tome nije zaplakao kako to <sup>v</sup>cine druga deca.

The relative clause introduced by kako is the adverbial clause of manner.

### Clauses of Purpose (Namerna recenica)

The adverbial clause of purpose states the purpose of the action of the main verb. It answers the question for what purpose?, why?, for what reason? The conjunctions used to join clauses of purpose to main clauses are:

zato, da, eda, kako, nek(a), li

Radimo puno eda bi kupilo auto. = Radimo puno. + Hocemo da kupimo auto.  
(We are working hard (in order) to buy a car.)

Idem u školu da se obrazujem. = Idem u školu. + Hocu da se obrazujem.  
(I'm going to school to get an education.)

\*\*Note that the verb hteti is implied and is omitted when the clauses are joined.

A prepositional phrase consisting of radi + noun may replace the above clause of purpose.

Idem u školu radi obrazovanja.

Otac se oputi od kuće da, poseti sina. =  
Otac se zato oputi od kuće. + Otac poseti sina.

Pozvati ču devojku da vam zapali kamin. =  
Pozvati ču devojku. + Devojka vam zapali kamin.

The conjunctions kako and li are used in negative sentences which are always in the conditional mood.

Ne otkida od usta drugih kako bi sam živio u izobilju. =  
Zato ne otkida od usta drugih. + Sam živi u izobilju.

Stedio sam novac ne bih li kupio auto. =  
Zato sam stideo novac. + (Hocu) da kupim auto.

### Clauses of Result (Posledicna recenica)

This kind of dependent clause describes the result of the action of the main clause. It is similar to causal clauses except that in clauses of result the cause is described in the main clause and the result in the dependent clause. In the main clause there are the adverbs:

tako, toliko, or the adjective - takav

The dependent clause is connected to the main clause by the conjunctions:

da or te

On je govorio tako glasno, da se culo preko ulice.  
(He spoke so loud that one could hear him across the street.)

On je takav da su svi njime radovoljni. =  
On je takav. + Njime su svo zadovoljni.

Magla je bila tako gusta te se jedva videla pred sobom. =  
Magla je bila tako gusta. + Jedva se videla pred sobom.

Marko je takav strucnjak da mu nema premca. =  
Marko je takav strucnjak. + Marku nema premca.

### Clauses of Concession (dopusna recenica)

Clauses of concession state something which is opposed to what is stated in the main clause. However, the statement of the dependent concession clause does not deny or nullify the validity of that which is said in the main clause.

Premda je dugo boravio u tujini, ostao je veran rodjenoj zemlji.  
(Although he lived abroad for a long time, he remained loyal to his country.)

The content of the dependent clause does not negate the content of the main clause. However, there is the implication that people who live in another country for a while either forget or lose their devotion to their native land, which is being contrasted or conceded to.

The connecting conjunction used in this type of clause is

premda - although

These clauses indicate something unexpected or opposed to what is expected to happen or be. These sentences answer the question: "In spite of what?"

Other conjunctions used in clauses of concession are:

ako i, iako, da i, ma, mada, makar, neka, koliko god.

Makar requires the active past participle:

Doci cemo makar i snijeg padao.  
(We will come even if it snows.)

Sometimes a condition can be expressed without a conjunction if the sentence has negated participles.

Htio, ne htio, moras doci.  
Like it or not, you have to come.

The condition is emphasized if the main clause begins with:

ali, opet, e.g.:

Iako nam je zemlja mala, opet je od velikog znacaja.  
Even though our country is small, it is still of great importance.

Note how the following sentences are combined into concession clauses.

Necu zaliti iako je to moj poslednji dolar. =  
Necu zaliti. + To je moj poslednji dolar.

Oni mnogo toga ne razmiju premda misle da im je sve jasno. =  
Oni ipak mnogo toga ne razumiju. + Ipak oni misle da im je sve jasno.

Ja cu to uciniti neka rekne tko sto hoce. =  
Ja cu to ipak uciniti. + Ipak rekne tko sto hoce.

If the relative clause indicates the possibility of an action occurring, although it does not happen, it is called an unreal concessive sentence. This type of sentence usually has verb forms in the conditional mood.

On bi bio nezadovoljan makar mu se ostvario san. =  
On bi ipak bio nezadovoljan. + Ipak mu se ostvario san.

Mi bismo ipak ostali ovde i kad bi stigla naredba o iseljavnju. =  
Mi bismo ipak ostali ovde. + Ipak bi stigla naredba o isoljavanju.

Clauses of time, concession, cause and relative clauses usually can be abbreviated with participial constructions, past or present; e.g.,

Napisavši radacu, otici cete u setnju. (time, past participle)  
(After doing your homework, you will then go for a walk.)

Buduci da hocu da kupim auto, treba mi novac. (cause, present participle)  
(Since I want to buy a car, I need money.)

Ostavši veran rodjenoj zemlji, on je boravio dugo u tudjini.  
(concession, past participle)  
(He remained loyal to his country living abroad.)

Covek koji pusi, je moj otac. - Puseci covek je moj otac.  
(Present participle used as an adjective. - Relative clause.)

### Clauses of Comparison (Poredbena recenica)

Sentences in which the content of the main clause is compared to the content of the dependent clause are called clauses of comparison.

✓  
Cim vise ucim tim manje znam.  
The more I study the less I know.

Clauses of comparison may also express identical action and contrast in action.

✓  
Cim vise ucim tim vise znam. (identical action)

The conjunctions used in identical action comparisons are:

✓  
cim - tim

In sentences which express the ultimate degree of comparison like:

✓      ✓      ✓  
Neznam da citam, da pisem a kamoli da govorim nemacki.  
(I don't know how to read, write or, even less, to speak in German.)

the following conjunctions are used:

nego sto, nego li, or kamoli, a kamoli, nekmoli, a nekmoli

### Clauses of Cause (Uzrocna recenica)

Adverbial clauses of cause convey the cause or reason for the activity expressed in the main clause. This clause tells why something happened. The most common conjunctions used in these sentences are:

jer, sto and occasionally gde

These conjunctions are used if there is regular word order.

For inverted word order the following conjunctions are used:

buduci, da, kako, kad

Treba mi novac jer hocu da kupim auto. (regular word order)  
I need money because I want to buy a car.

Buduci da hocu da kupim auto, treba mi novac. (inverted word order)

The preposition zbog (because of) expresses the cause of the action:

Zbog larme ne mogu da ucim.  
(from: Velika je larma. Ne mogu da ucim.)

The preposition radi (in order to, or, for the sake of) expresses intention:

On ide u grad radi kupovanja knjiga.

Analyze the following sentences:

Mozda bi me ustrijelili bas zato sto su svi o tome mislili.

-from-

Mozda bi me ustrelili bas zato. + Svi su o tome mislili.

Silno se radovao gde je nasao takova coveka.

-from-

Silno se radovao zato. + Nasao je takova coveka.

Buduci da ste pocinili krivicno delo morate za nj odgovarati.

-from-

Pocinili ste krivicno delo. +  
Pocinili ste krivicno delo zato. +  
Morate za krivicno delo i odgovarati.

### Clauses of Condition (Pogodbena recenica)

The adverbial clause of condition explains the circumstances under which the statement in the main clause will be true or under which circumstances the action will take place. These clauses answer the question "under what circumstances?" They can be divided into: 1) Real Conditions, 2) Possible Conditions, and 3) Impossible Conditions.

- 1) In a real conditional clause, the action of the subordinate clause will take place if the action of the main clause takes place. E.g.

Ako polozim ispit biti cu vrlo zadovoljan.  
(If I pass the exam, I will be very happy.)

The connecting conjunctions are: ako, kada, li

- Sometimes conditional clauses can be used without conjunctions. E.g.,

Pokazi mu put i on ce naci.  
(Show him the road and he will find it.)

- 2) Possible conditions describe situations in which actions could occur.

Kada biste stedjeli imali biste vise novaca.  
(If you would save you would have more money.)

Note that both verbs are in the conditional form indicating that we are not sure whether the action of the main clause will occur. Therefore, we have the same conjunctions as in the real conditional sentences, but the conditional form of the verb must be used in the main clause or in both clauses.

- 3) In unreal or impossible conditional sentences unreal conditions are expressed. E.g.

Da se nas narod nije borio protiv okupatora, mi nebi sada bili slobodni.  
(If our people would not have fought the occupying forces, we would not be free now.)

Both actions are contrary to the facts since they did fight and are free. Here too, the same conjunctions are used:

da, kada

Note that the verb forms in both sentences have to be conditional.

CHART OF DEPENDENT CLAUSES

Kind of sentence	Example	Connecting words
Subj ective:	Tko marljivo radi, biti će nagradjen.	relative, interrogative, pronouns and adverbs, conj: tko, sto da
Predicative:	Tvoj rad je takav, da smo njime zadovoljni.	
Attributive:	Posjetili smo druga, koji je obolio.	interr. pronoun, adverbs, conj. da
Objective:	Radnici obecavaju, da će unaprediti proizvodnju.	interr. pron., adverbs, conj. da, e, kako, gdje
Adv. clauses of manner:	Radimo danas onako kao sto su nasi ocevi radili.	kako, kao sto, kao da, kanda
Clauses of degree:	Sto vise radim, sve manje zaradim.	sto - to, nego sto, nego li;
Clauses of space:	Gde su bila pusta polja, izrasle su nove tvornice.	kamo, kuda, otkud, odakle
Clause of time:	Proslala su tri meseca kako radimo na istom poslju.	1) kada, dok, dokle, kako, otkako; 2) posto, cim, tek, tek sto, kada kako, istom, dok, dokle 3) prije nego, (sto), dok, dok ne
Clauses of cause:	Treba mi novac jer hocu da kupim auto.	jer, sto, gde 1) jer, sto, gde 2) buduci da, kako, kada
Clause of result:	On je govorio tako glasno da se culo preko ulice.	da, tako da da, eda, kako, neka, li
Clause of purpose:	Idem u skolu da se obrazujem.	1) ako, kada, li 2) ako, kada 3) da, kada
Clause of condition:	Kada biste stedeli imali biste vise novaca.	ako, ako li, da i, makar, ma da premda
Clause of concession:	Premda je dugo zivio u tuddjini, ostao je veran redjenoj zemlji.	

Two main clauses in compound sentences are most often connected by coordinate conjunctions, as shown in the chart, but there are several other possibilities.

a) Conjunctive Adverb:

Mi smo dugo zvonili, međutim, niko nije otvorio vrata.  
We rang the bell for a long time. However, nobody answered the door.

b) Coordinating Conjunction plus Conjunctive Adverb:

Oni su dugo razgovarali i zbog toga su se morali zuriti doma.  
They spoke for a long time and consequently had to rush home.

c) No connective at all but a semi-colon standing between the two clauses; e.g.,

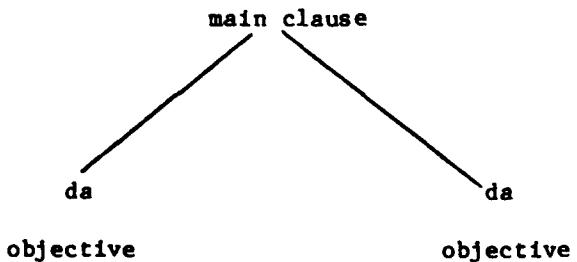

Otvorio sam prozor; bilo je tako svježe.  
I opened the window; it was so refreshing.

A complex sentence is a sentence containing at least one subordinate clause. The dependence can be expressed in different ways:

1) Identical dependence is seen when all dependent clauses answer the same question. Example:

Dosla sam da te vidim i da porazgovaramo.  
I came to see you and to chat with you.

Why did I come? Both answer the same question.

2) Consecutive Dependence

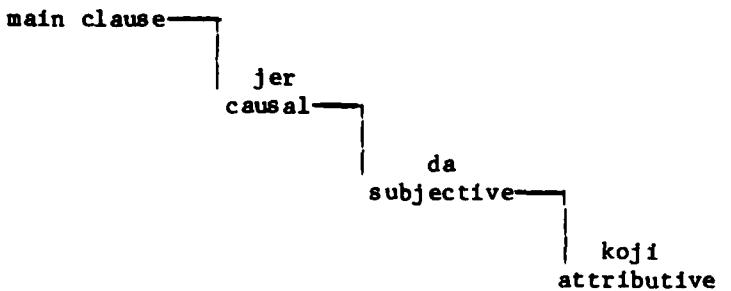

In a sentence:

Nisam verovala svojim ocima, je se to još nije dogodilo, da bi se nasao pas, koji nije voleo decu.

I didn't believe my eyes because it never happened before that one could find a dog that wouldn't love children.

We have a complex sentence in which the first clause is the main clause, the second one is one of cause, the third clause is subjective and the fourth

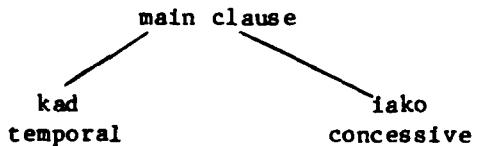

one attributive. They all depend on the succeeding one; therefore, they have a consecutive dependence. Their conjunctions are not the same ones but are separated by commas. The scheme is as follows:

But if the dependent clauses do not answer the same question and are not connected by the same conjunction, for example:

Kada sam usao, ona se nasmejala, iako nije znala zasto.  
When I entered, she smiled, not knowing why.

We have another scheme:

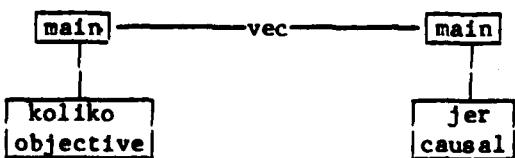

#### IV. Compound-Complex Sentences

A sentence containing two or more main clauses and at least one subordinate clause is called a compound-complex sentence. In this kind of construction we have several groupings; e.g.,

Nikad ne mislim, koliko da trosim, vec malo trosim, jer moram.  
I never think how much I spend, but I am thrifty because I have to be.

Here are two main clauses connected with "vec" and each of them has a dependent clause. The scheme is:

Indicate the secondary parts of each of the following sentences:

1. Ona se često sečala njega.
2. Svaka majka voli svoju decu.
